Onboarding users

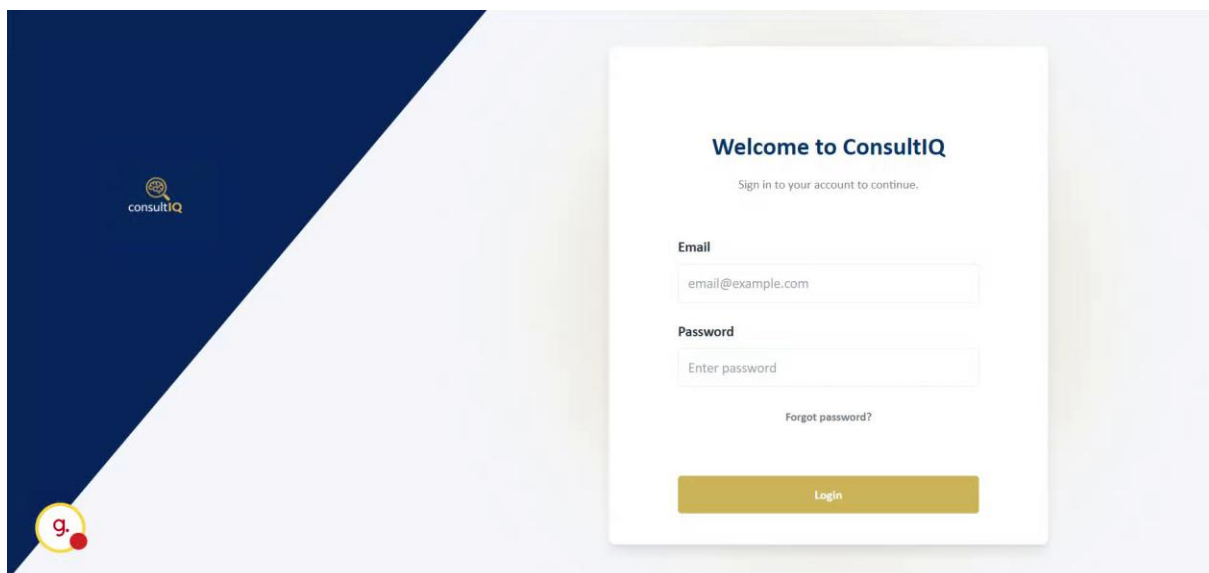

Registering consultant and project managers:

This tutorial explains how to onboard a consultant manager or project manager using ConsultIQ, you will learn the steps an admin takes to register a new consultant manager successfully.

Go to consultiq.com

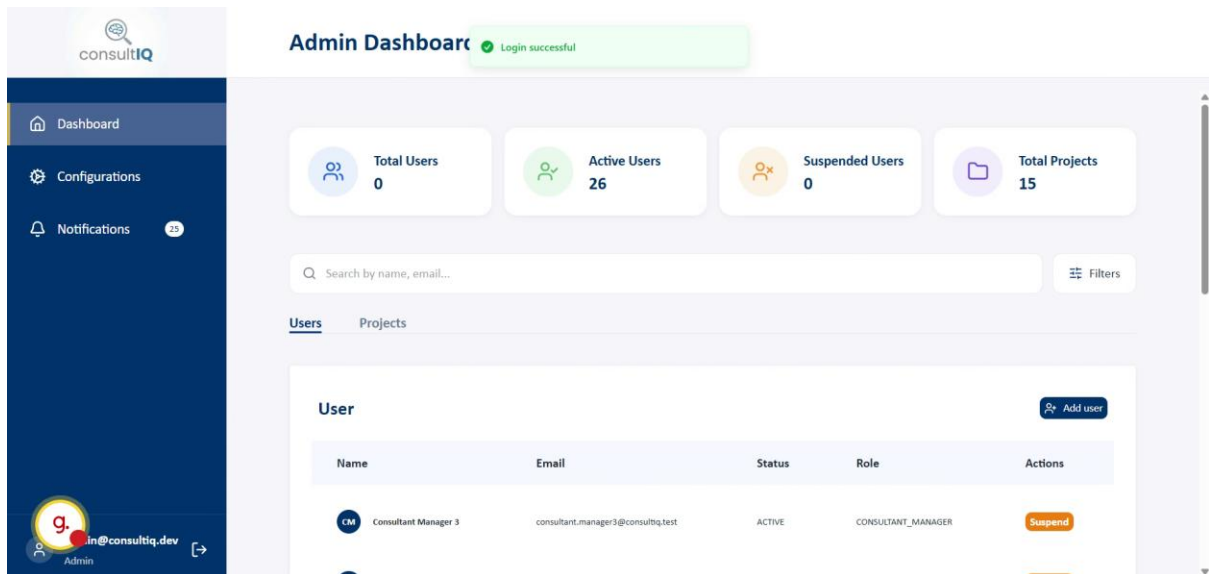

1. Log In as Admin

Welcome to ConsultIQ. This is the onboarding process for consultant manager or project manager, a consultant/project manager can only be, onboarded, or registered by an admin. As an admin, you want to log in by entering my email and my password.

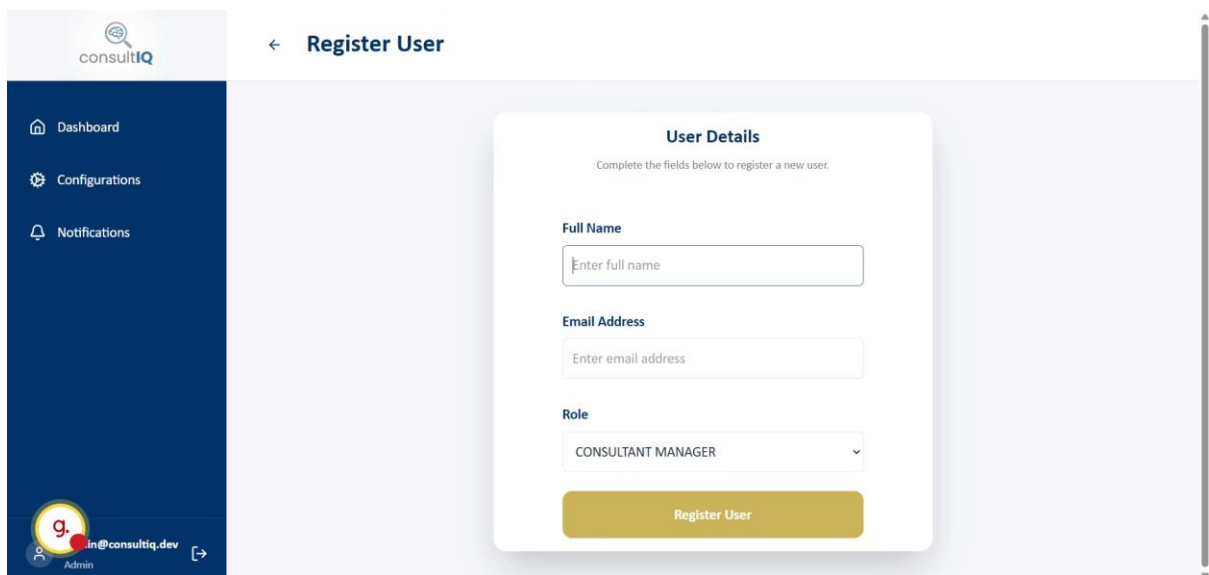

2. Click Add User Button

Once you have logged in successfully, then press the add user button to register a consultant manager.

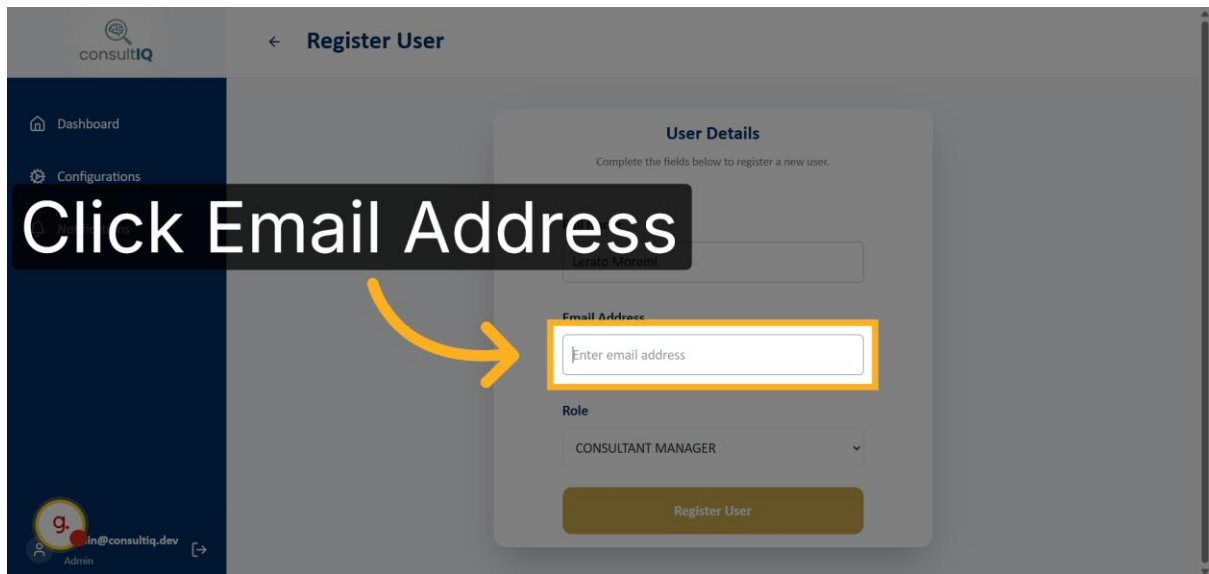

3. Enter Name and surname

Enter the name and surname of the manager.

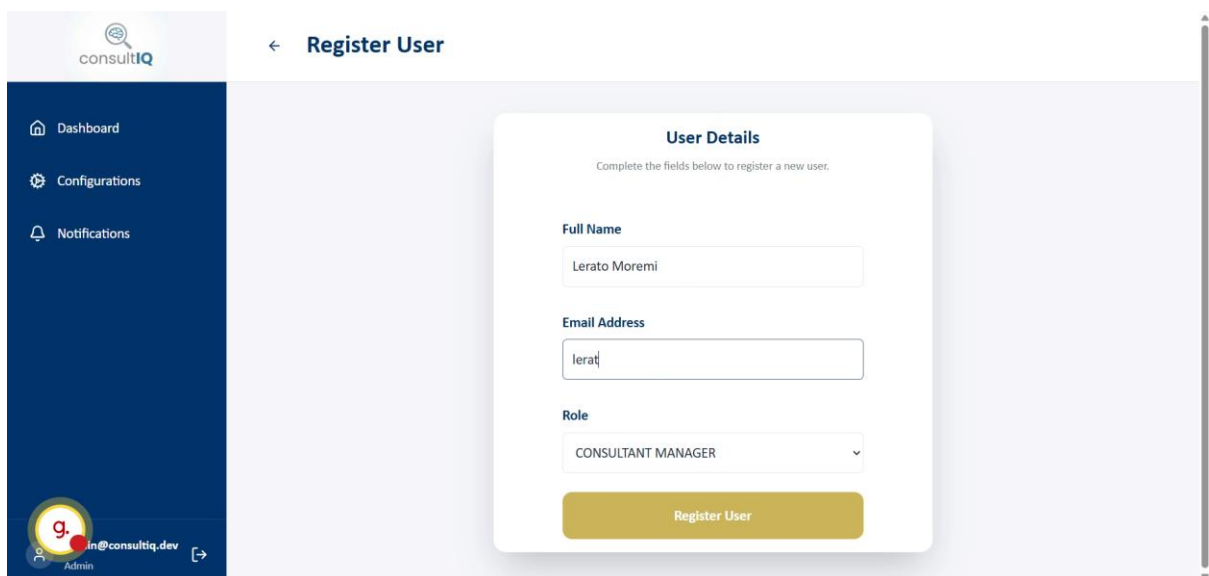

4. Click Email Address Field

Click the email address field.

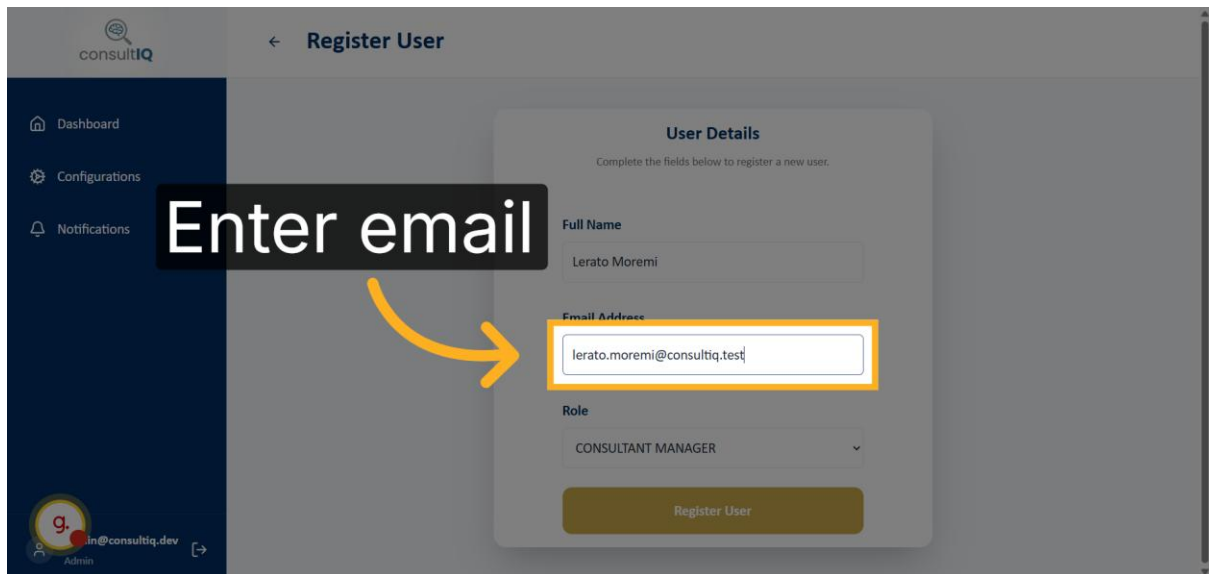

5. Enter Their Email

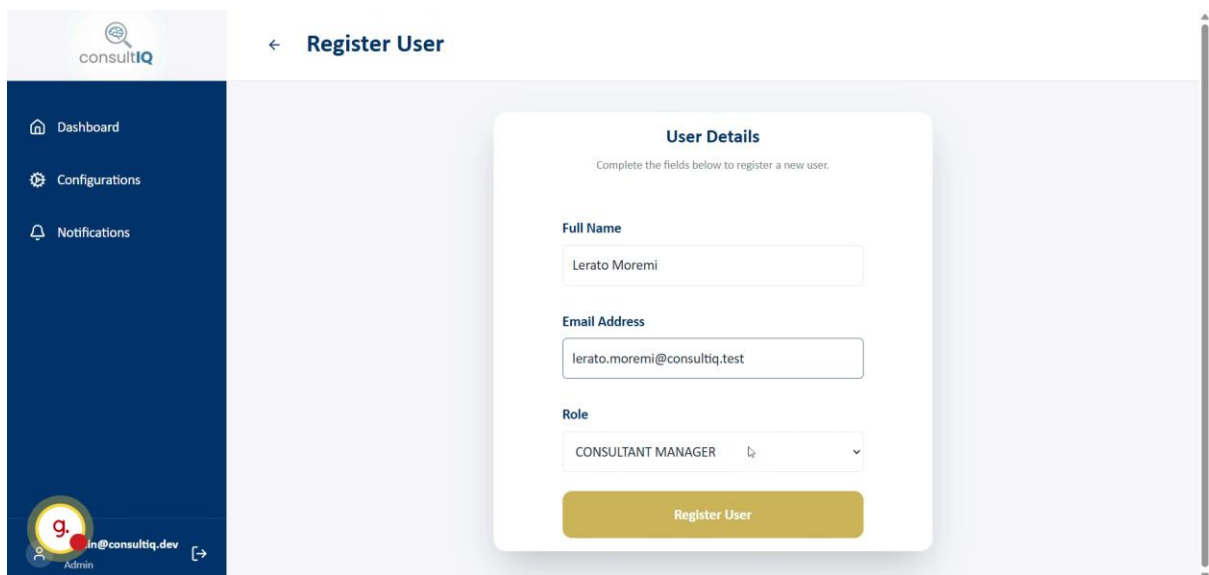

6. Enter The Manager's Email Address

Enter the email address.

7. Select User Role

Select their role.

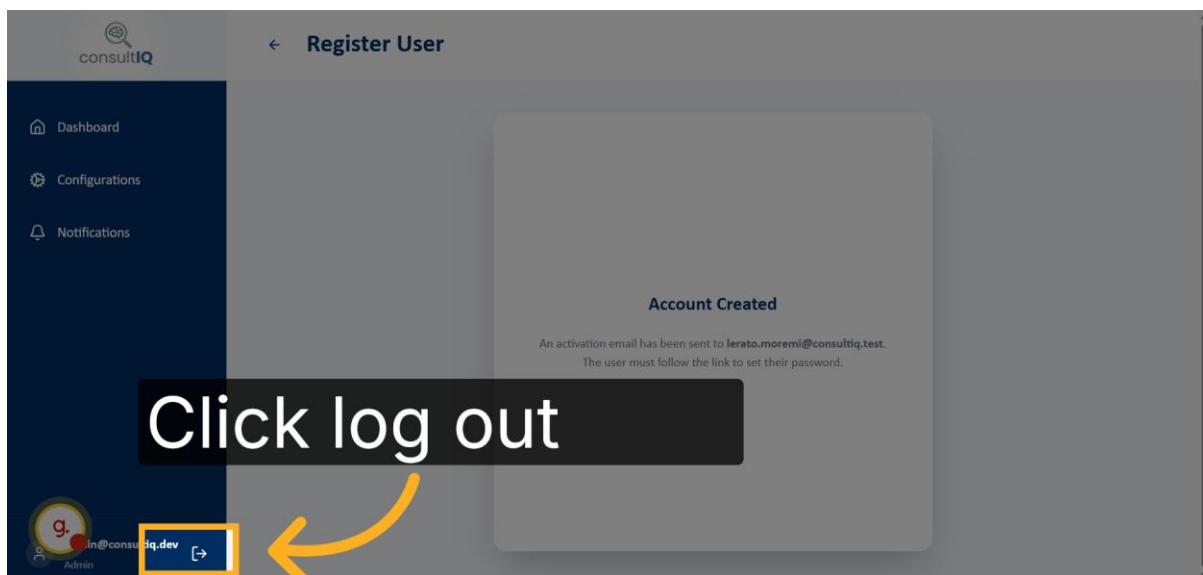

8. Register User and Send Email

Click the register user button. Now, an email has been sent to the consultant/project manager for them to activate their account.

The screenshot shows the 'Register User' page in the consultIQ application. On the left is a dark blue sidebar with navigation links: 'Dashboard', 'Configurations', and 'Notifications'. At the bottom of the sidebar is a user profile for 'Admin' with the email 'in@consultiq.dev'. The main content area is titled 'Register User' and contains a 'User Details' form. The form has three input fields: 'Full Name' (filled with 'Lerato Moremi'), 'Email Address' (filled with 'lerato.moremi@consultiq.test'), and 'Role' (a dropdown menu set to 'CONSULTANT MANAGER'). A yellow 'Register User' button is at the bottom of the form.

9. Click the logout button

Click the logout button once you're done.

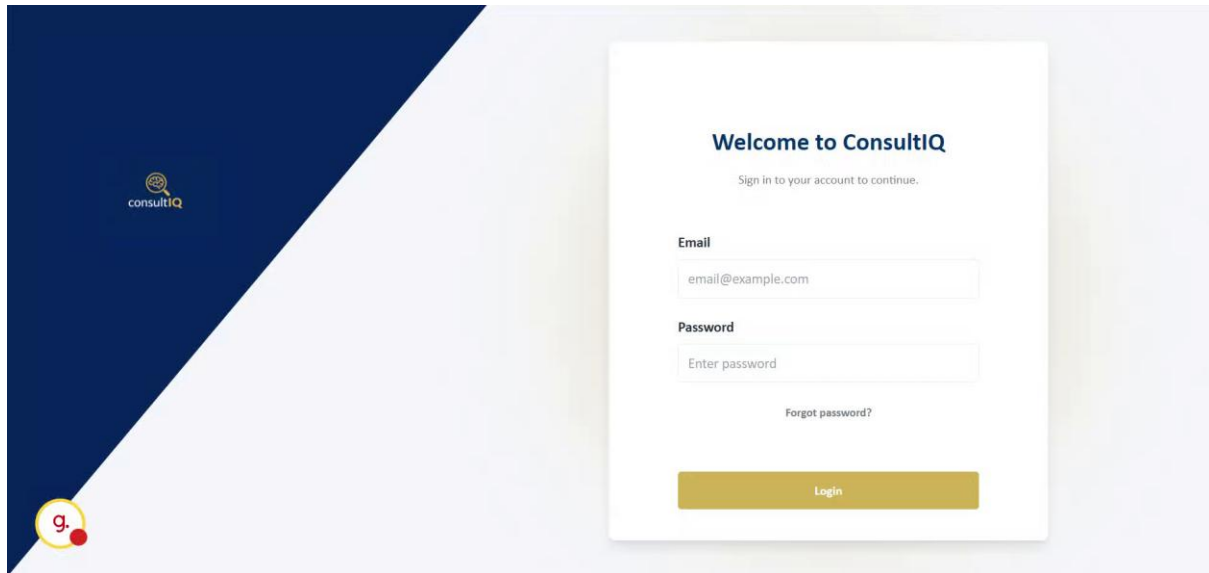

This tutorial guides admins through the process of onboarding, a consultant/project manager. Including logging in, adding user details and selecting their roles in completing registration.

Registering a consultant

Register Consultants

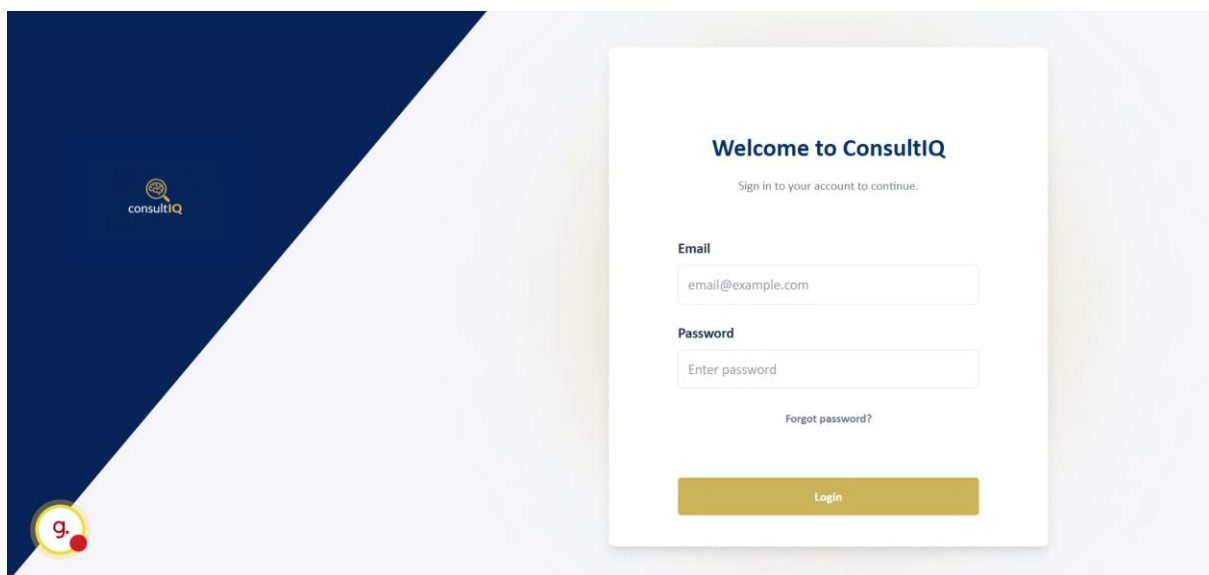

1. Introduce Onboarding Process

This is the onboarding process for registering a consultant.

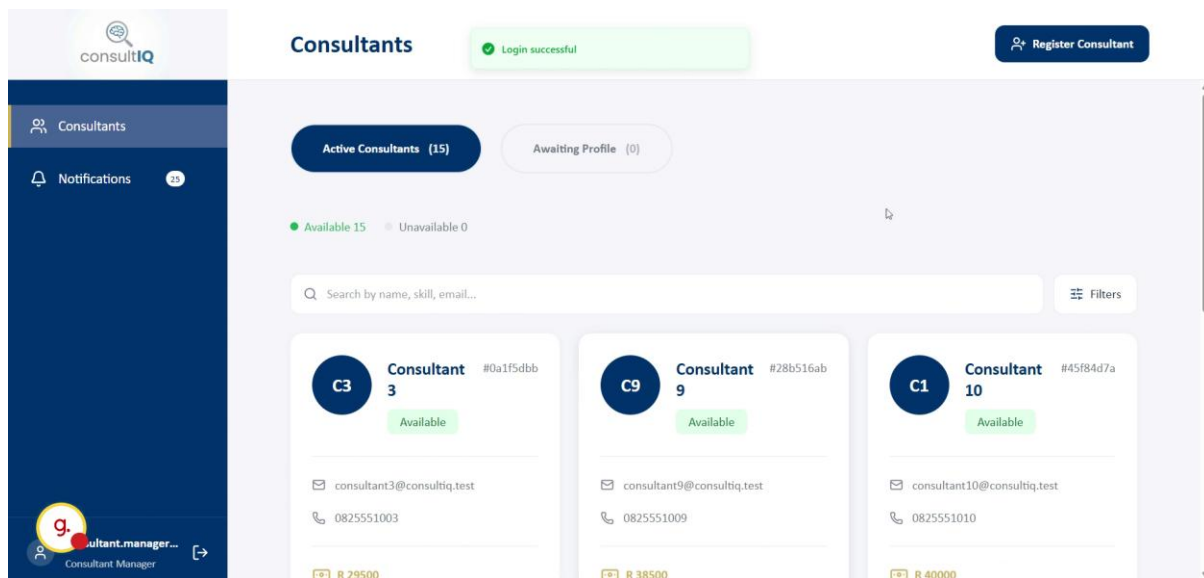

2. Log In as Consultant Manager

A consultant can only be registered by a consultant manager. So as a consultant manager, to log in, I need to enter my email and my password.

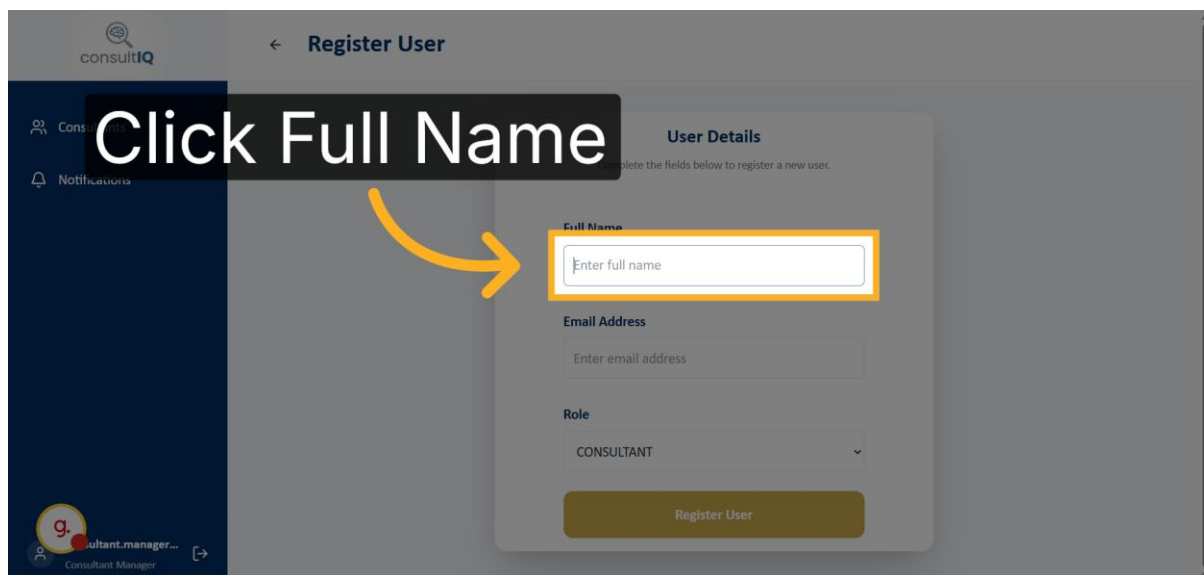

3. Click Register Consultant Button

From there, I click the register consultant button.

4. Select Full Name Field

Select the full name field to enter the consultant's name.

5. Enter Consultant Details

Enter the consultant's name and surname and their email.

Confirm the logout action to end the session securely.

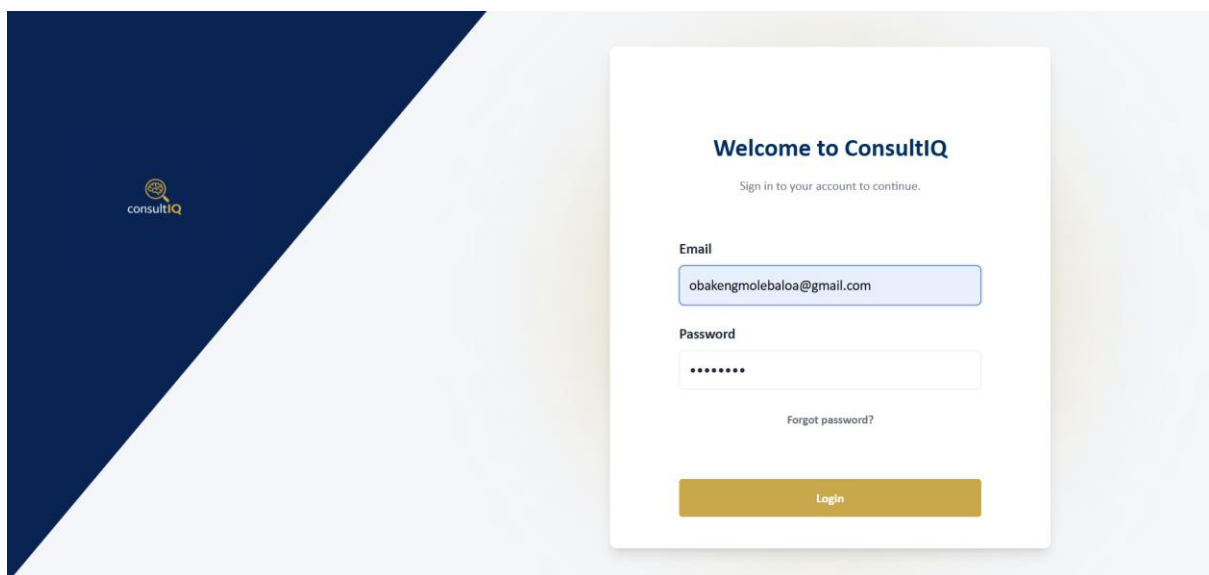

Profile creation

Create And Manage Consultant Profiles In ConsultIQ

This tutorial explains how to create and manage consultant profiles using ConsultIQ. You will learn the steps to activate accounts into detailed information and finalize profiles for consultant.

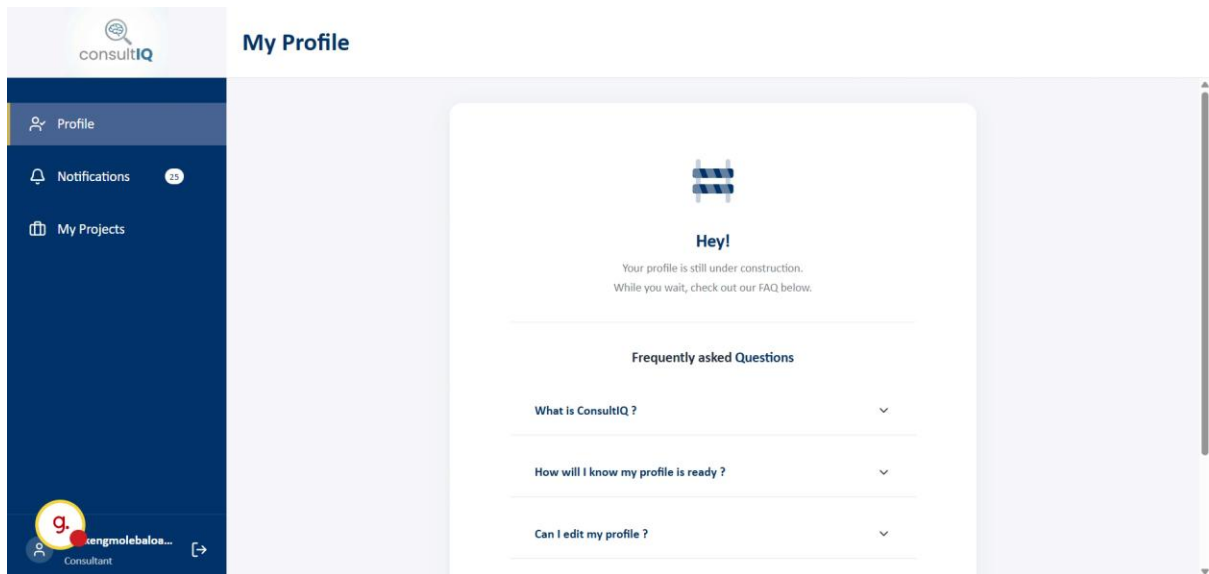

1. Activate Consultant Account

Once a consultant has click the activation links into their email, the account will now be activated. They are now able to log in by entering the email and their password.

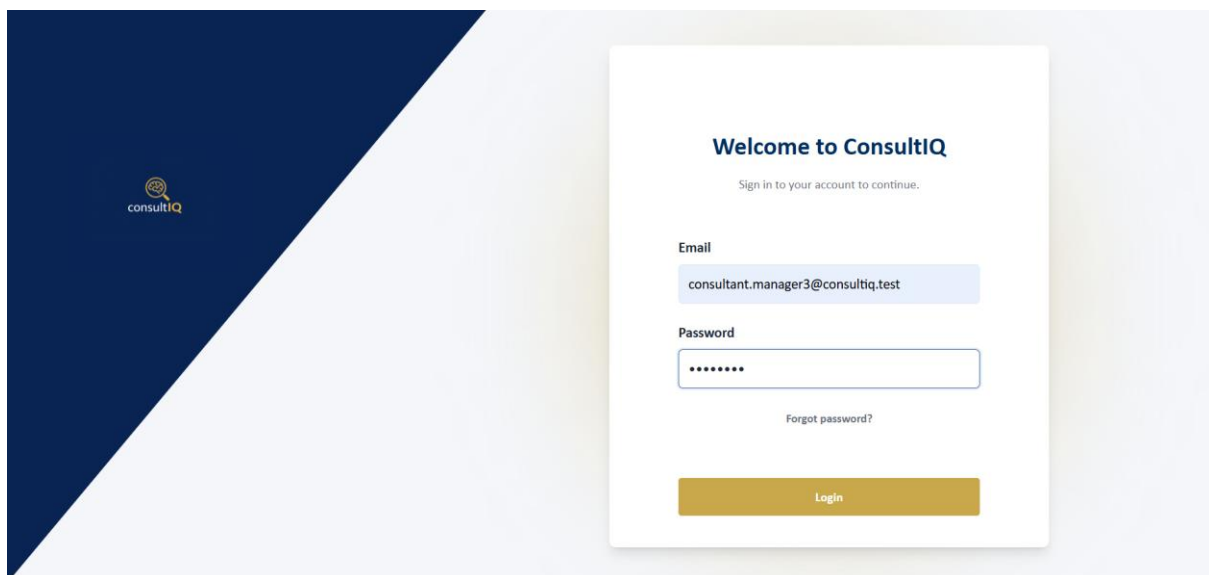

2. View Profile Under Construction Message

Because their profile has not been created as of yet, they are met with an under construction message. Once their profile has been updated, it will appear on this table.

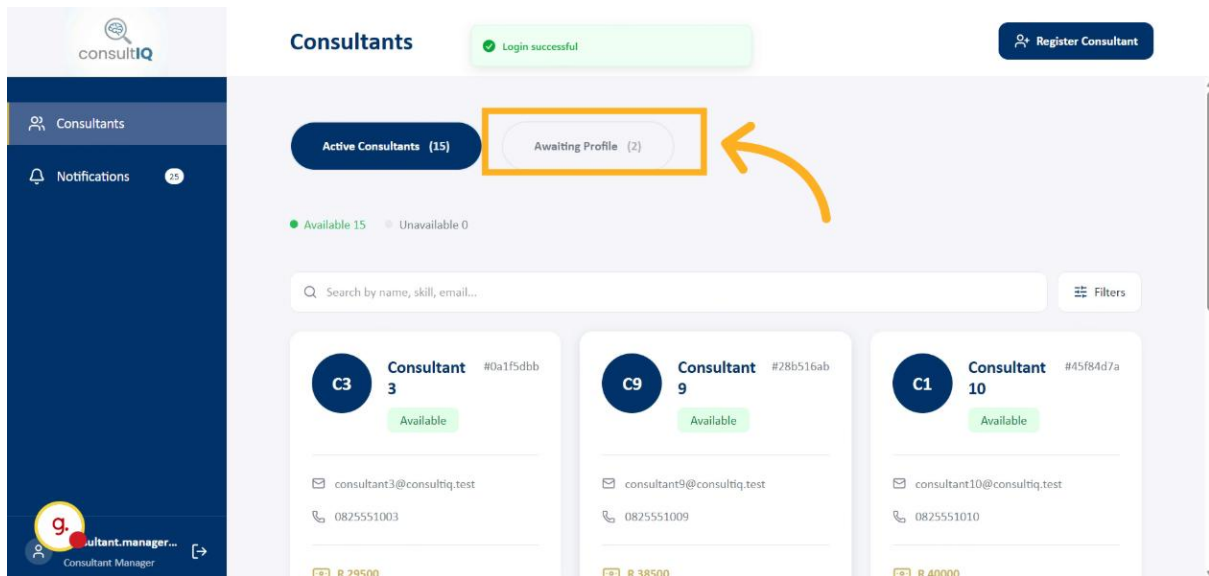

3. Log In as Consultant Manager

A consultant manager is responsible for creating profiles for Consultants. Log in as a consultant manager, by entering the email and the password.

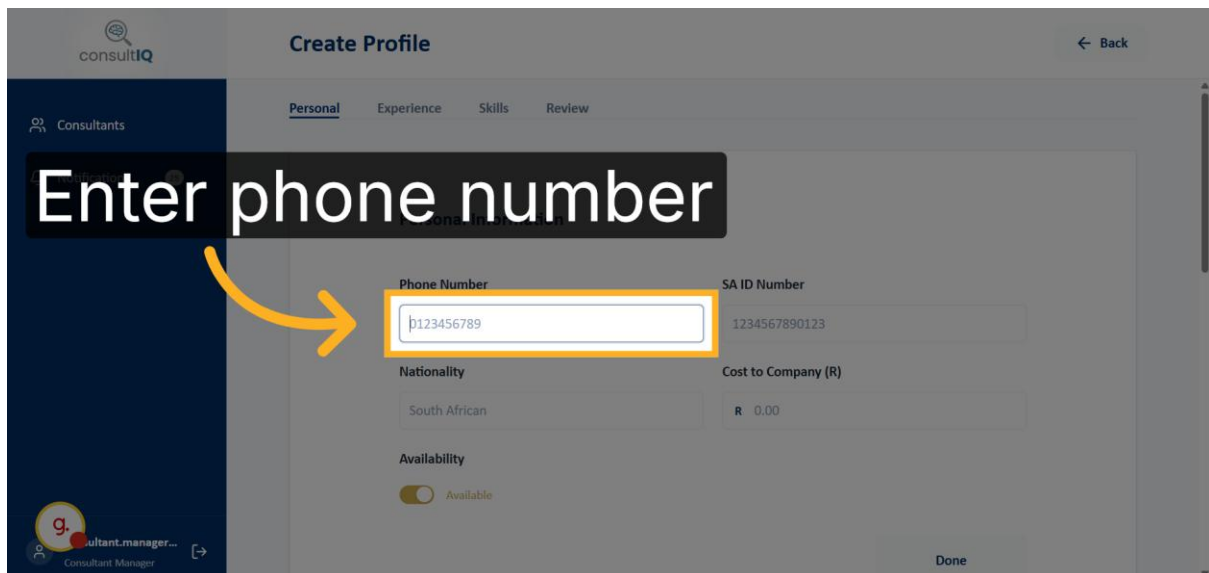

4. Create Consultant Profile

I now navigate to The Waiting profile tab, where we will see all Consultants with other profiles. I can then as a consultant manager creates a profile for consultant by clicking, the create profile button.

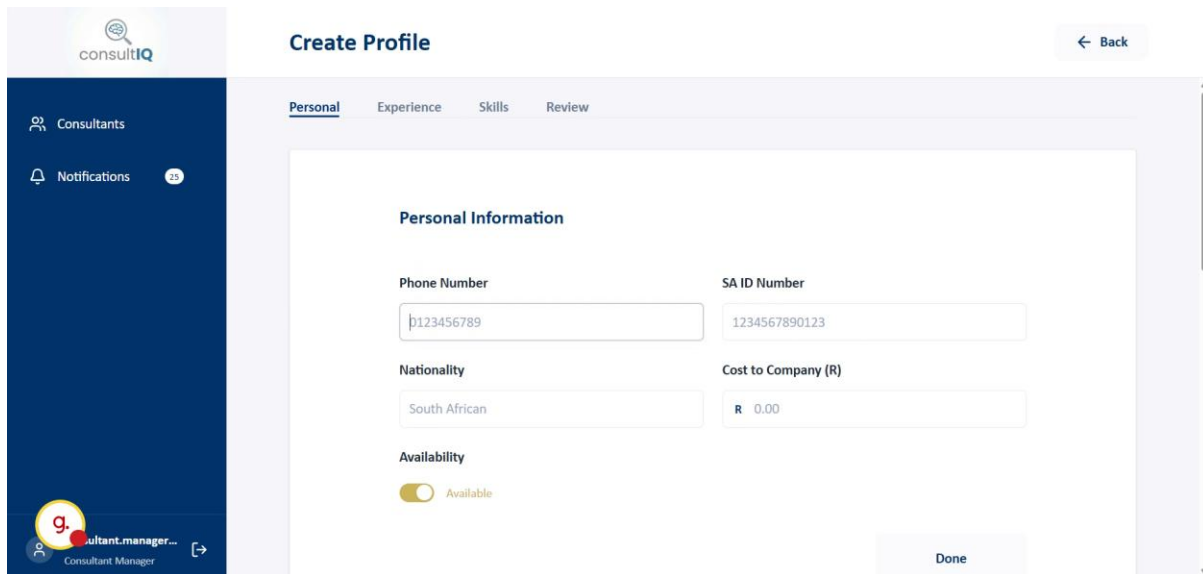

5. Select Phone Number Field

Select the phone number field to enter the Consultants contact information.

6. Enter Personal Information

Then enter the rest of the Consultants personal information. Nationality, ID number and their cost to company rate. Once you're done filling in personal information, click the done button and personal information is saved.

8. Add Consultant Work Experience

Then we add the experience of the consultant then the type of the work model, the start and end date and the job description. Click the add experience button and the experience has successfully been added.

The screenshot shows the 'Create Profile' interface with the 'Experience' tab selected. The left sidebar contains 'Consultants' and 'Notifications' (25). The main form area includes a 'Personal' tab, an 'Experience' tab (active), a 'Skills' tab, and a 'Review' tab. The 'Experience' tab contains a 'Company Name' field, 'Job Type' and 'Work Model' dropdowns, 'Start Date' and 'End Date' (with a note 'leave blank if current') date pickers, and a 'Job Description' text area. An 'Add Experience' button is at the bottom right.

9. Select Skills Tab

Select skills tab to specify the Consultants professional skills and competencies.

The screenshot shows the 'Create Profile' interface with the 'Skills' tab selected. A yellow arrow points to the 'Skills' tab. A large black box with white text 'Click Skills tab' is overlaid on the form. The 'Skills' tab contains a list of added experiences, including 'first national bank' with the role 'Junior software developer', dates '04 Feb 2020 — 30 Jun 2022', and a description 'software solutions were built'. A 'Remove' button is next to the experience entry. A 'Next: Skills' button is at the bottom right.

10. Specify Consultant Skills

You then specify the scale of the consultant, which includes the skill name, the number of years of experience, confidence level and competency level, which is automatically calculated. At the skill and the skill is displayed in the panel here.

Certificate upload

12. Enter Education and Certificates

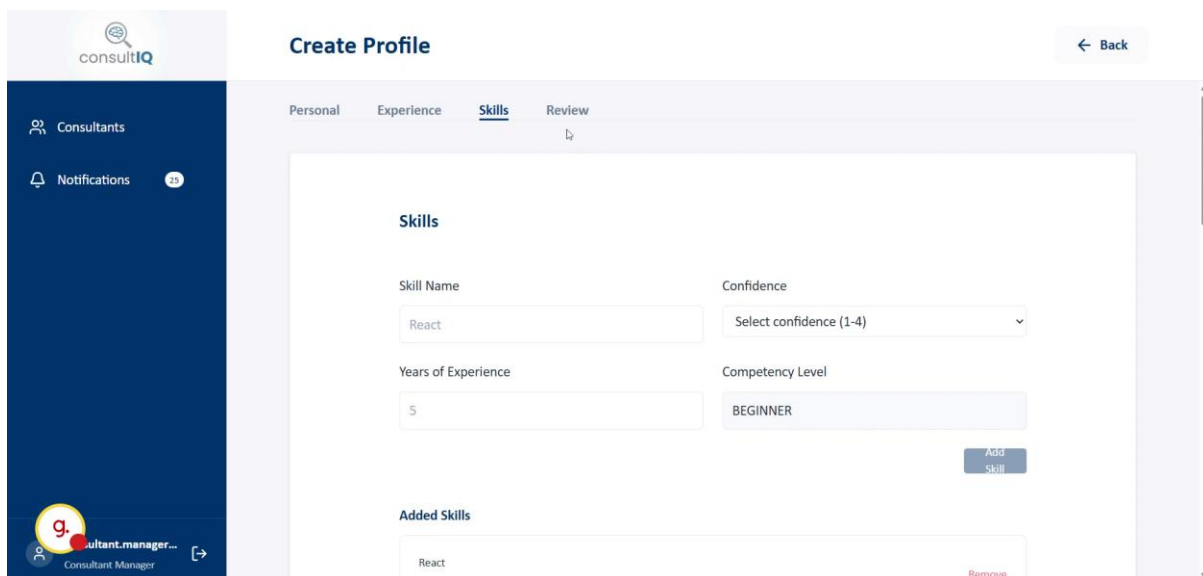

The institution name, the qualification, start date, and the end date are also entered. We have the option of selecting certificates as well. Education has been added.

The screenshot shows the 'Create Profile' interface with the 'Education' tab selected. The left sidebar contains 'Consultants', 'Notifications' (25), and a user profile for 'Consultant Manager...'. The main content area has tabs for 'Personal', 'Experience', 'Skills', and 'Review'. The 'Education' section includes fields for 'Institution Name' (University Name), 'Qualification' (BSc Computer Science), 'Start Date' (DD/MM/YYYY), 'End Date' (DD/MM/YYYY), and a 'Certificate upload' button.

13. Review and Finalize Profile

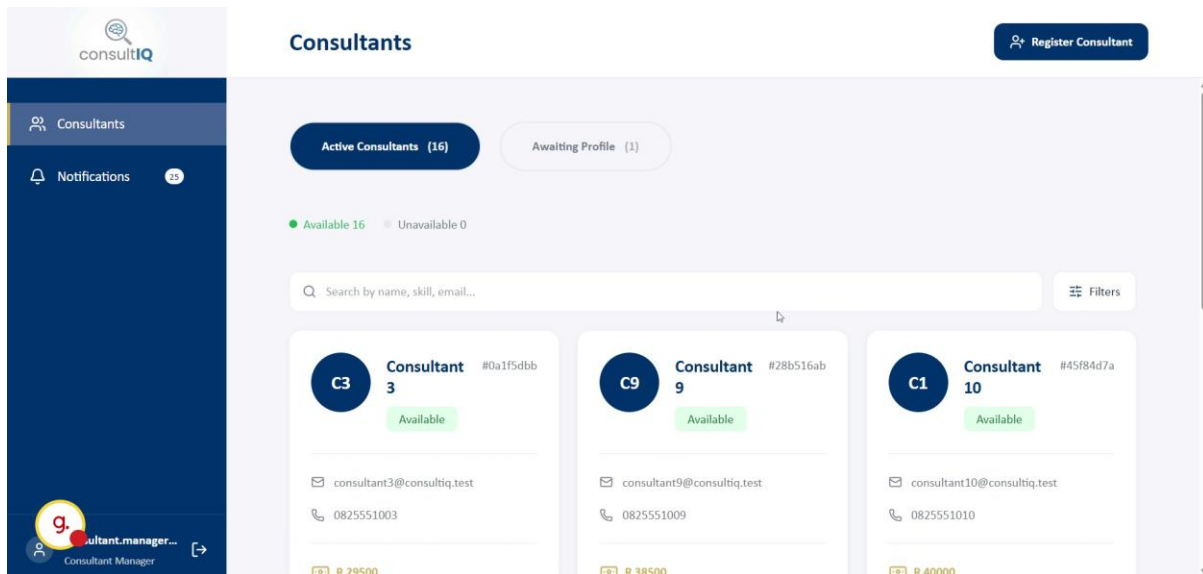

Then go to the review tab where we can see all information needed or added by the consultant manager. Click create profile. The profile is now finalized.

The screenshot shows the 'Create Profile' interface with the 'Skills' tab selected. The left sidebar is the same as in the previous image. The main content area has tabs for 'Personal', 'Experience', 'Skills', and 'Review'. The 'Skills' section includes fields for 'Skill Name' (React), 'Confidence' (Select confidence (1-4)), 'Years of Experience' (5), and 'Competency Level' (BEGINNER). There is an 'Add Skill' button and an 'Added Skills' list showing 'React' with a 'Remove' link.

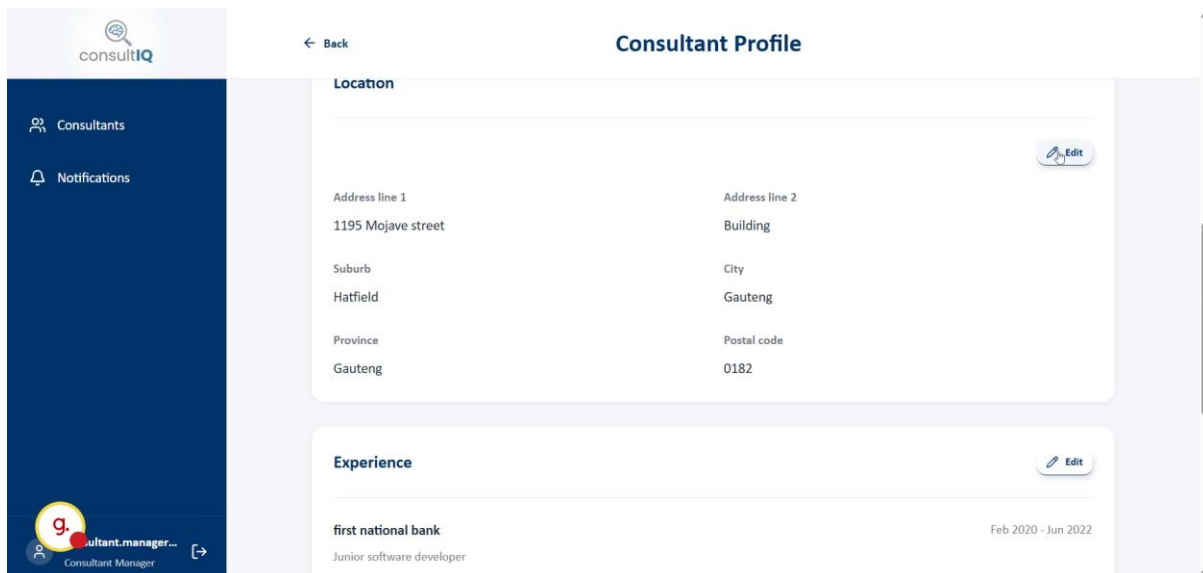

14. Search and View Profile

You can search our newly created profile and view it.

15. Edit and Save Profile Changes

You can also edit the existing profile and save changes.

16. Update Profile Information

Profile can be updated as well.

The screenshot shows the 'Consultant Profile' form in the ConsultIQ application. The form is titled 'Consultant Profile' and has a 'Back' button at the top left. The form contains several input fields for location information: 'Address line 1' (1195 Mojave street), 'Address line 2' (Building), 'Suburb' (Hatfield), 'City' (Gauteng), 'Province' (Gauteng), and 'Postal code' (0182). There are 'Save' and 'Cancel' buttons at the top right of the form. The left sidebar shows 'Consultants' and 'Notifications' options, and a 'Consultant Manager' link at the bottom.

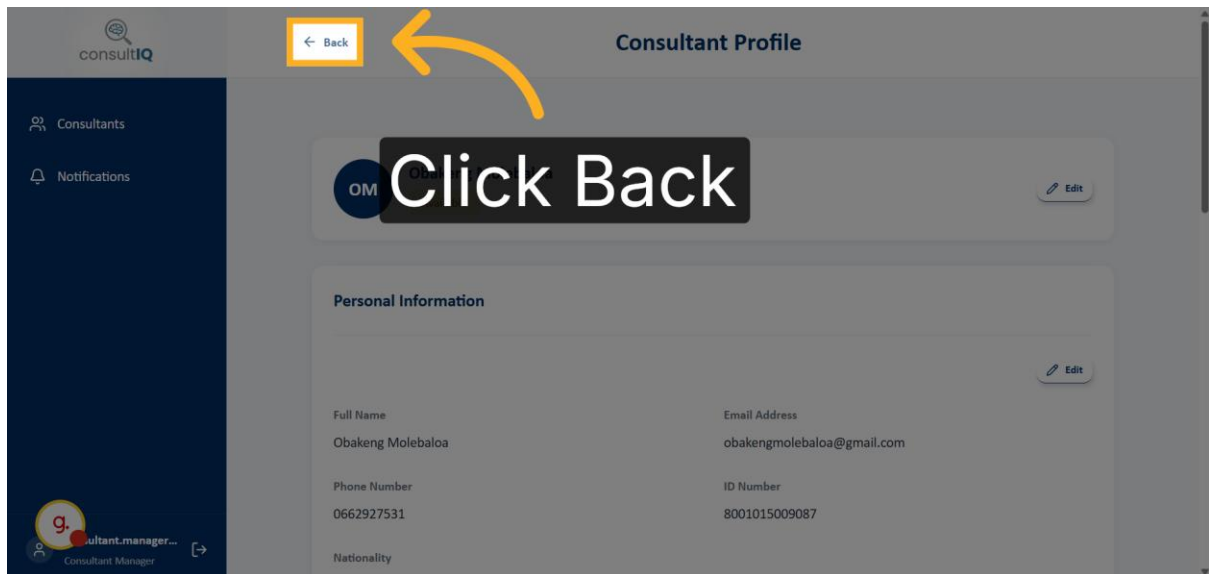

17. Save Profile Changes

Check the save button to apply and store profile updates.

This screenshot is identical to the one above, but with an overlay indicating the next step. A large black box with the text 'Click Save' is positioned over the 'Save' button. A yellow arrow points from the text box to the 'Save' button, which is also highlighted with a yellow border. The 'City' field now contains 'pretoria' instead of 'Gauteng'.

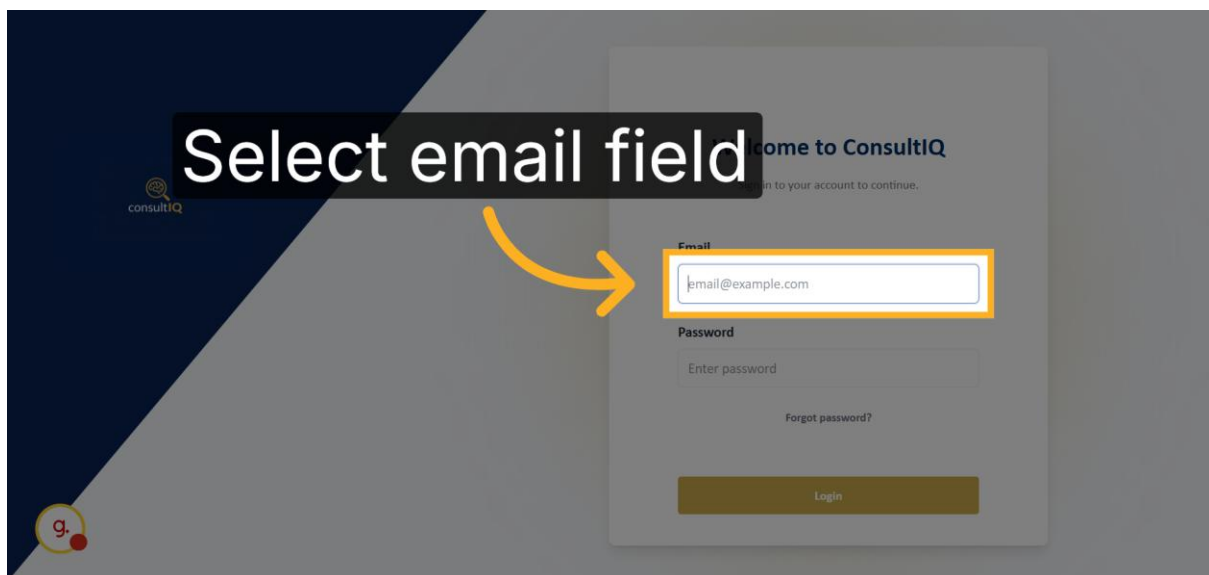

18. Navigate Back

Click the back button to return to the previous screen or menu.

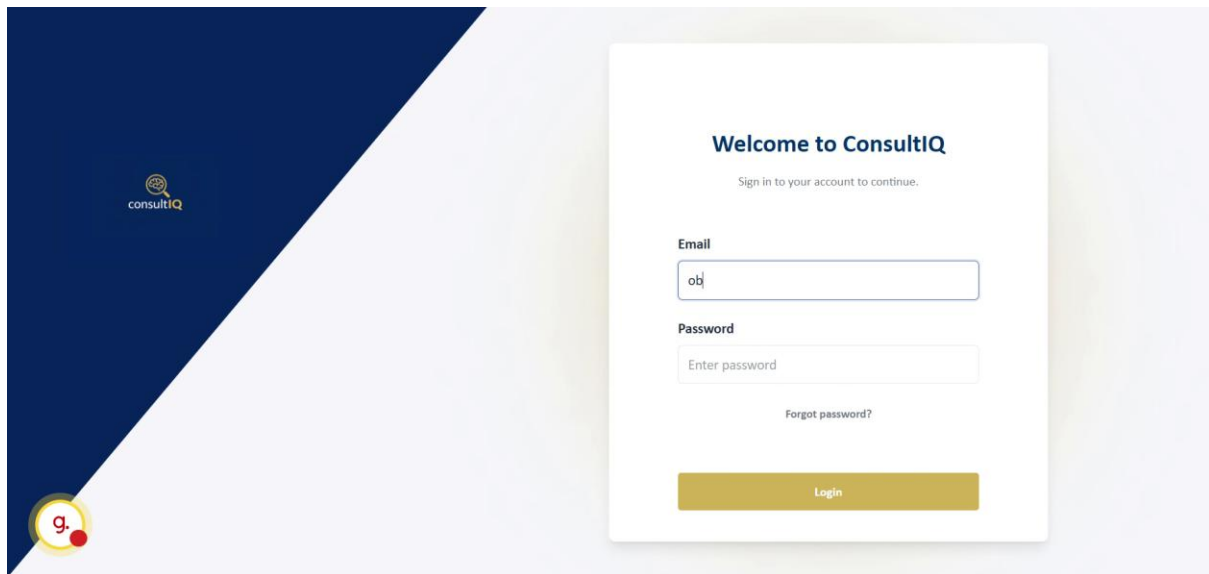

19. Select Email Field

We Now log back in as the consultant,

20. Consultant Views Updated Profile

As we can see, we now see that their profile has now been updated.

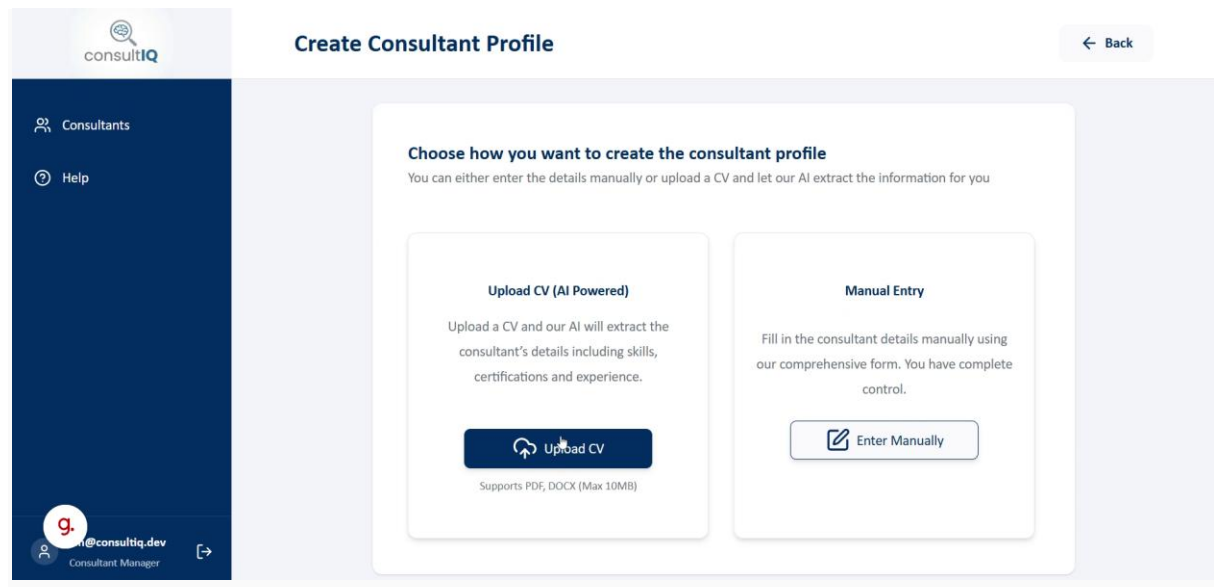

The tutorial guided you through creating managing and updating consultant profiles within consult IQ. You learned how to activate accounts interpersonal and professional information and finalize profiles for consultant use.

The profile can also be created by uploading your CV. The parser will then extract information from the CV. This tutorial explain how to do so.

Introduction

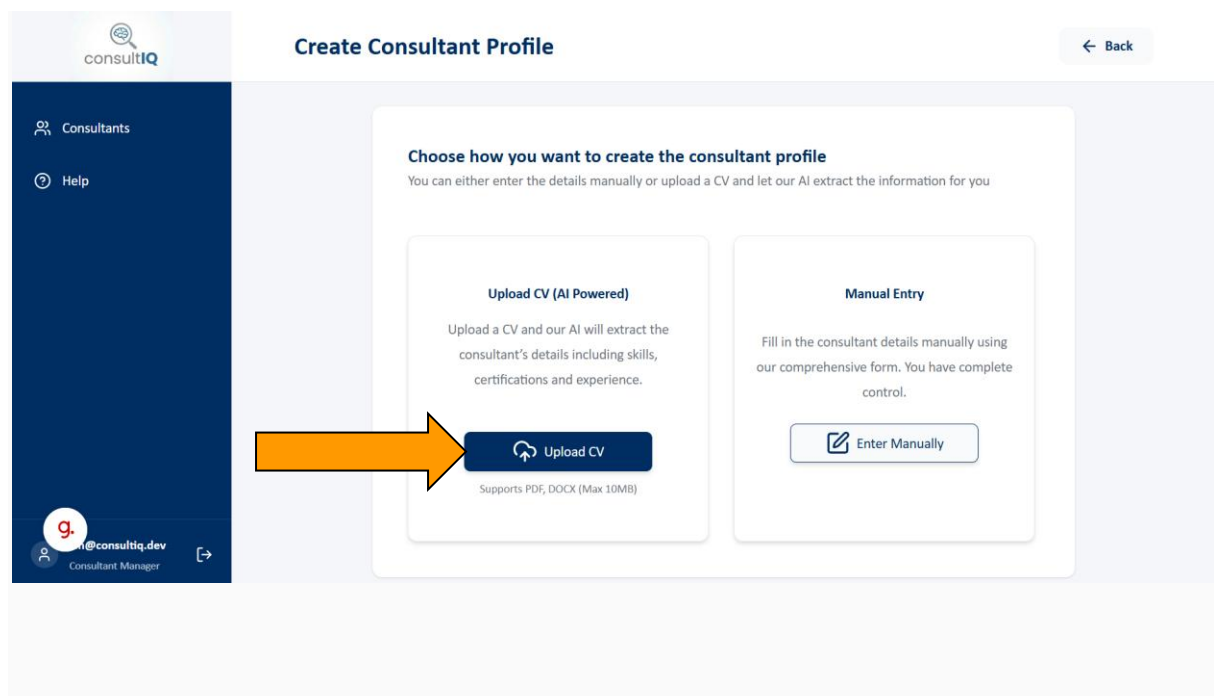

Before starting, ensure you have the CV in pdf or docx format ready for upload.

02

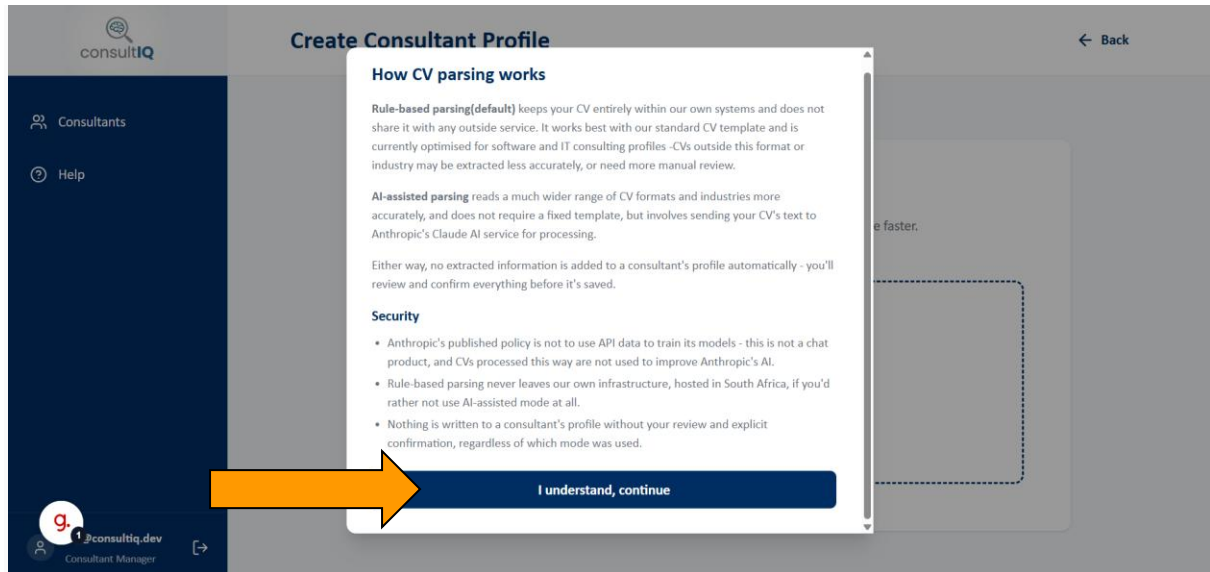

Click Upload CV Button

Click the Upload CV button to begin adding a new resume to the system securely.

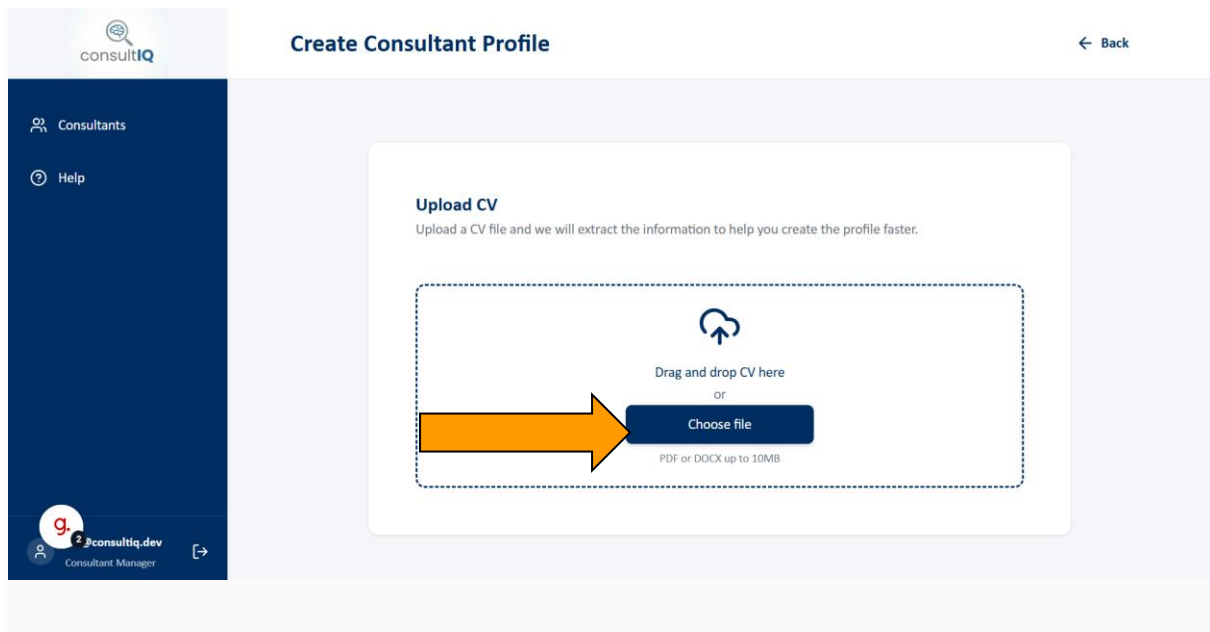

Acknowledge Terms and Continue

Click I understand, continue to confirm your agreement with the upload terms and proceed safely.

Select CV File

Click Choose file to open your device's file browser and select the CV you want to upload.

Activate AI-Assisted Parsing

Specify the parsing method by clicking **AI-assisted Parsing** to enable automated extraction of key CV data for efficient review. You can also click the rule-based parsing if preferred.

The screenshot shows the 'Create Consultant Profile' interface. On the left is a dark blue sidebar with the 'consultiq' logo at the top, 'Consultants' and 'Help' links, and a user profile for 'g. @consultiq.dev' at the bottom. The main content area is titled 'Create Consultant Profile' with a 'Back' link. Below this is the 'Upload CV' section, which includes the text 'Upload a CV file and we will extract the information to help you create the profile faster.' A file named 'Onthatile Molebaloa CV.pdf' (0.19 MB) is shown. Below the file name are two radio buttons: 'Rule-based Parsing' (unselected) and 'AI-assisted Parsing' (selected). Below these are two buttons: 'Change File' and 'Confirm & Upload'. A large orange arrow points from the right towards the 'AI-assisted Parsing' radio button.

08

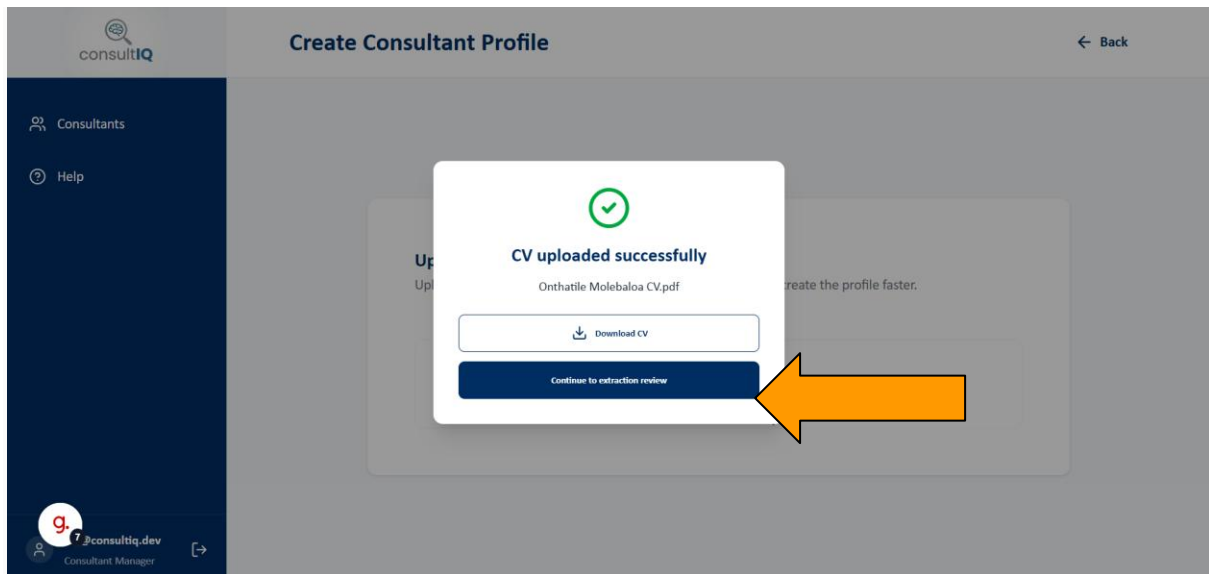

Confirm and Upload CV

Click **Confirm & Upload** to securely submit the CV and start the parsing process.

This screenshot is identical to the previous one, showing the 'Create Consultant Profile' page with the 'AI-assisted Parsing' option selected. In this version, the 'Confirm & Upload' button is highlighted with an orange rectangular box, and a large orange arrow points from the right towards this button.

Proceed to Extraction Review

Click **Continue** to extraction review to verify the accuracy of the parsed CV data.

Review CV details

Review and adjust the consultant data if you wish.

The screenshot shows the 'Review Extracted CV Details' page. The page has a 'Back' button in the top right corner. The main content area contains several form fields: 'ID number (13 digits)', 'Cost to company', 'Availability' (a dropdown menu currently set to 'Available'), and a 'Skills' section. The 'Skills' section is a table with four rows, each representing a skill. Each row has columns for 'Skill', 'Years experience', 'Competency', and 'Confidence (1-4)'. The skills listed are C++, C#, Python, and Delphi. The 'Years experience' for all skills is 0, 'Competency' is Beginner, and 'Confidence' is 1.

Skill	Years experience	Competency	Confidence (1-4)
C++	0	Beginner	1
C#	0	Beginner	1
Python	0	Beginner	1
Delphi	0	Beginner	1

Finalise the consultant profile

Click the approve and create profile button to complete profile creation.

Scoring engine configurations

Configure Project Scoring Settings in ConsultIQ

The tutorial explains how to set project level configurations for the scoring engine. You will learn the necessary steps to customize the scoring settings for your project.

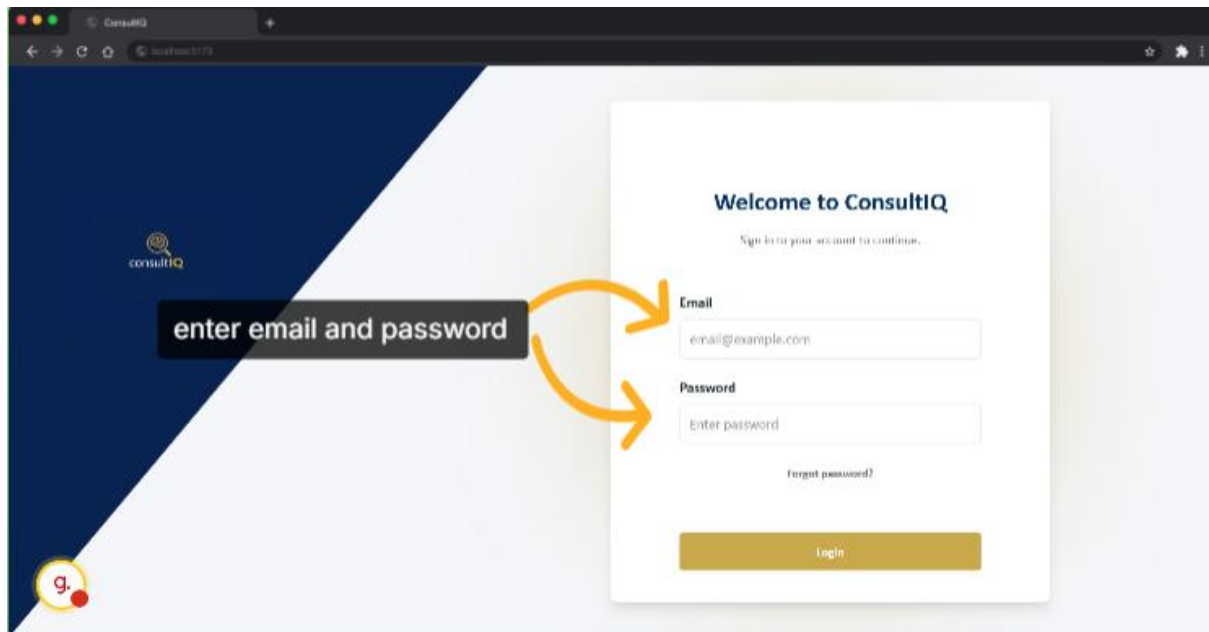

1. Understand Project Manager Permissions

Only a project manager is allowed to set the configurations per project.

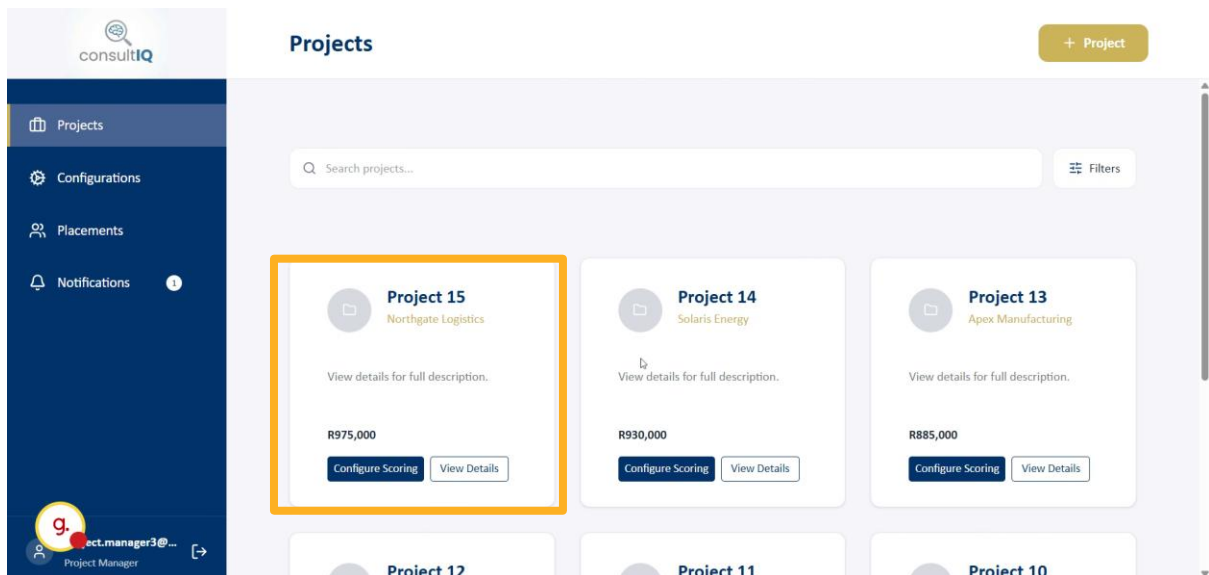

2. Log In as Project Manager

As a project manager enter your email and password. Click the login button to login

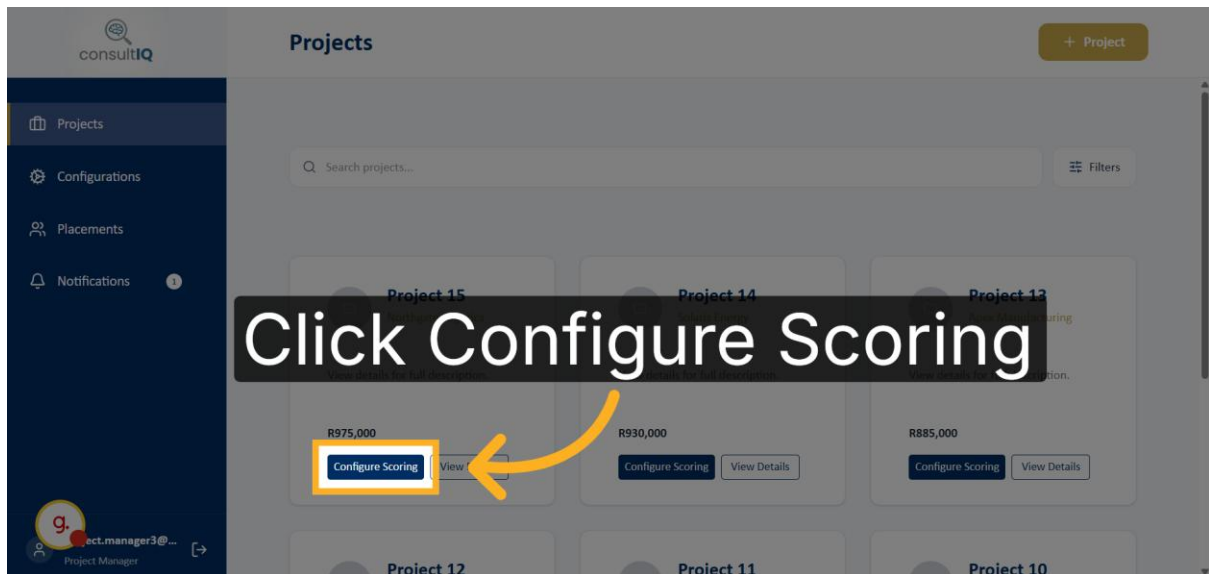

3. Select Project to Configure

You then select the project, you wish to configure.

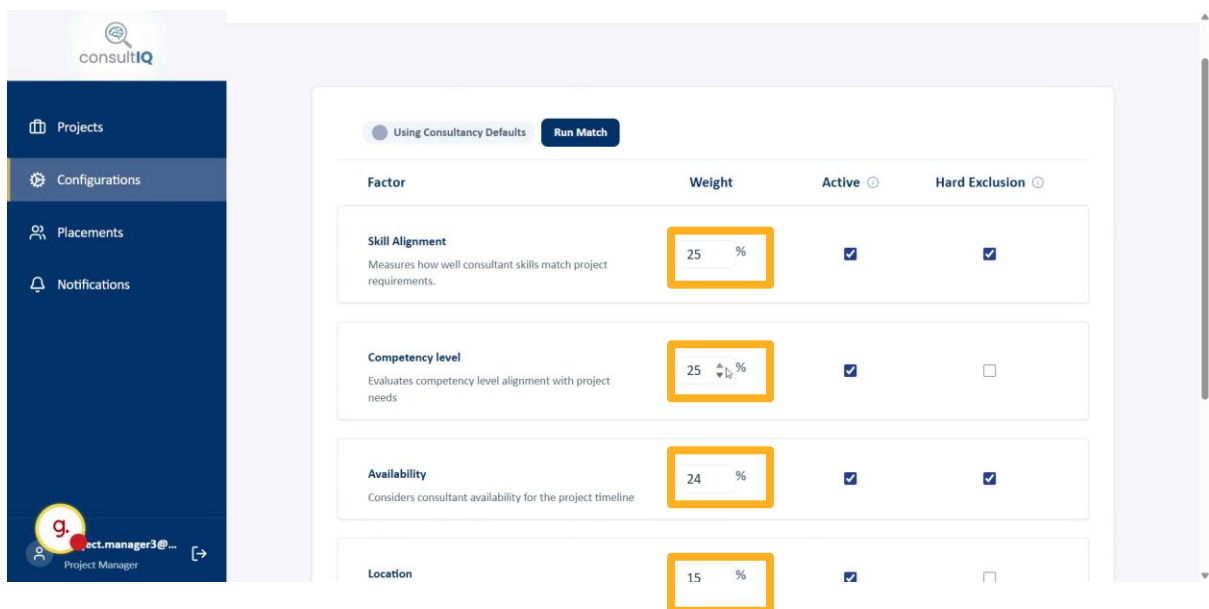

4. Open Scoring Configuration

Click the configure scoring button to access the scoring settings for the selected project.

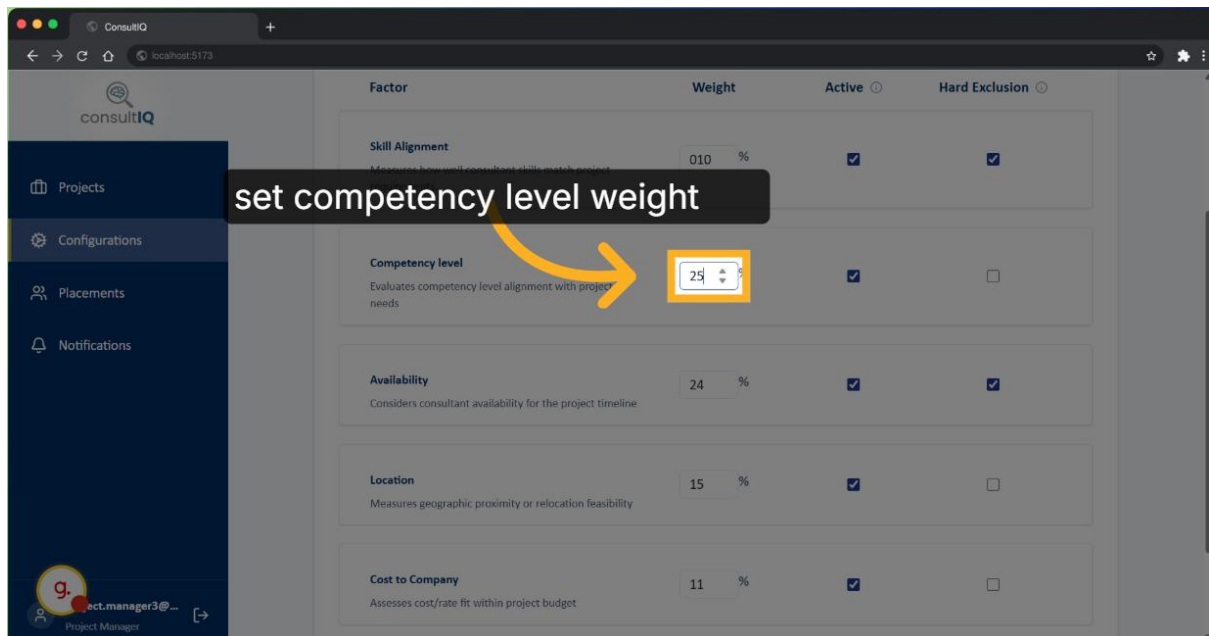

5. Set Weight Percentages

You then set the weights how you desire until they add up to 100%.

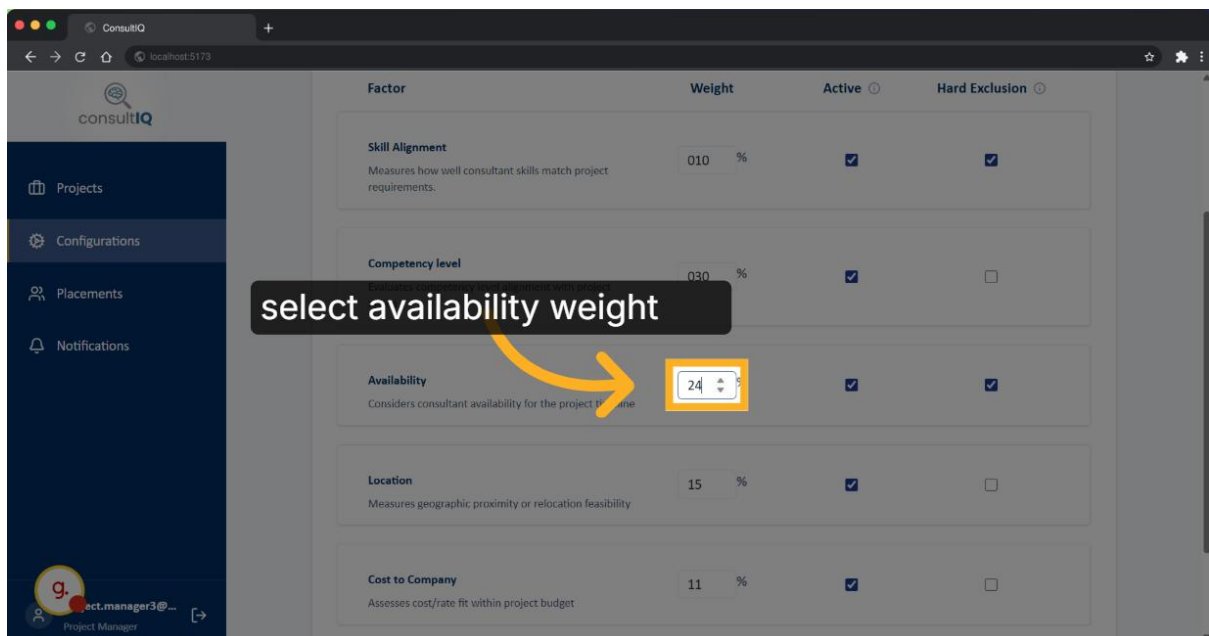

6. Modify competency level weight

Select the desired weight percentage to adjust the scoring factor accordingly.

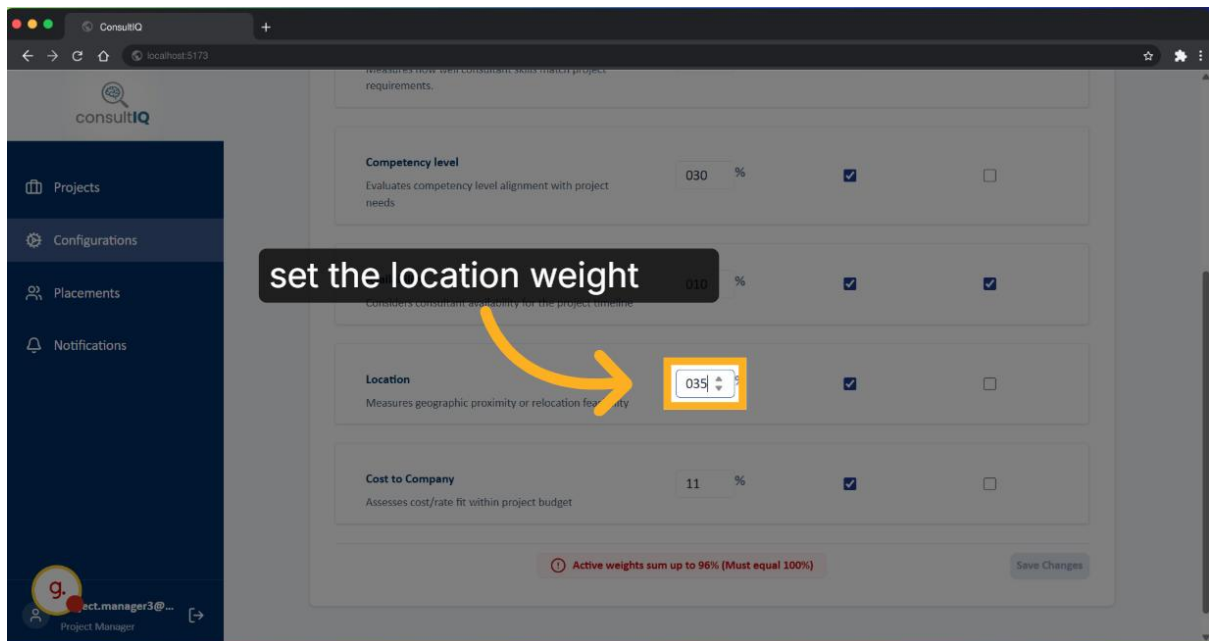

7. Modify availability weight

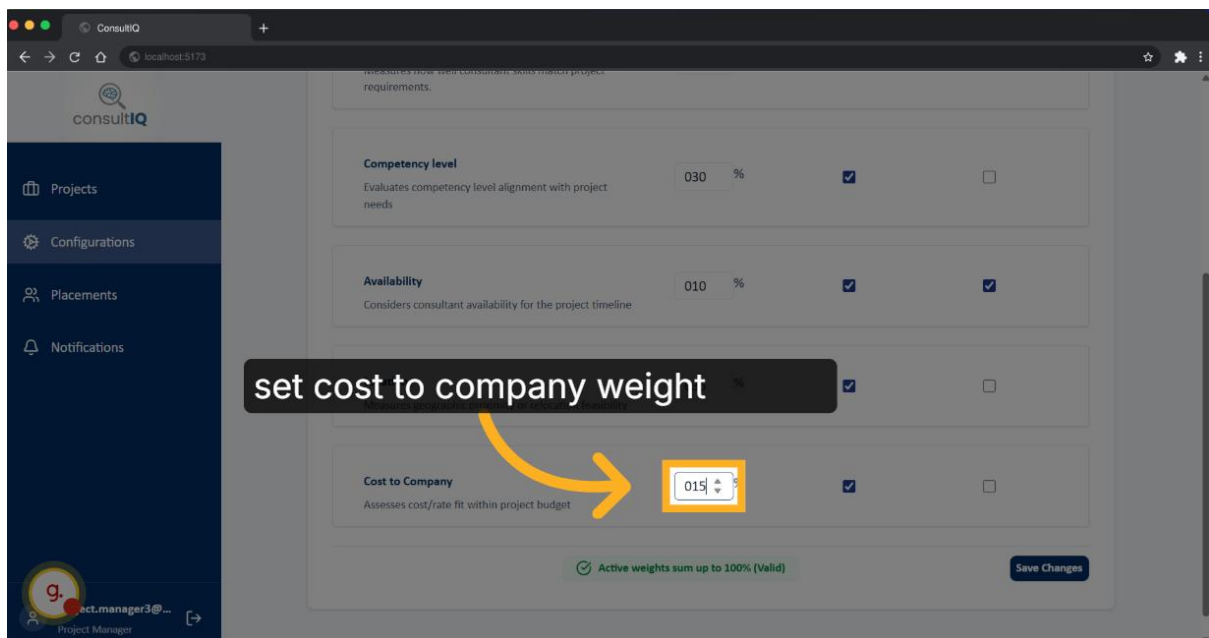

Adjust the percentage for each of the ratings until they add up to 100%.

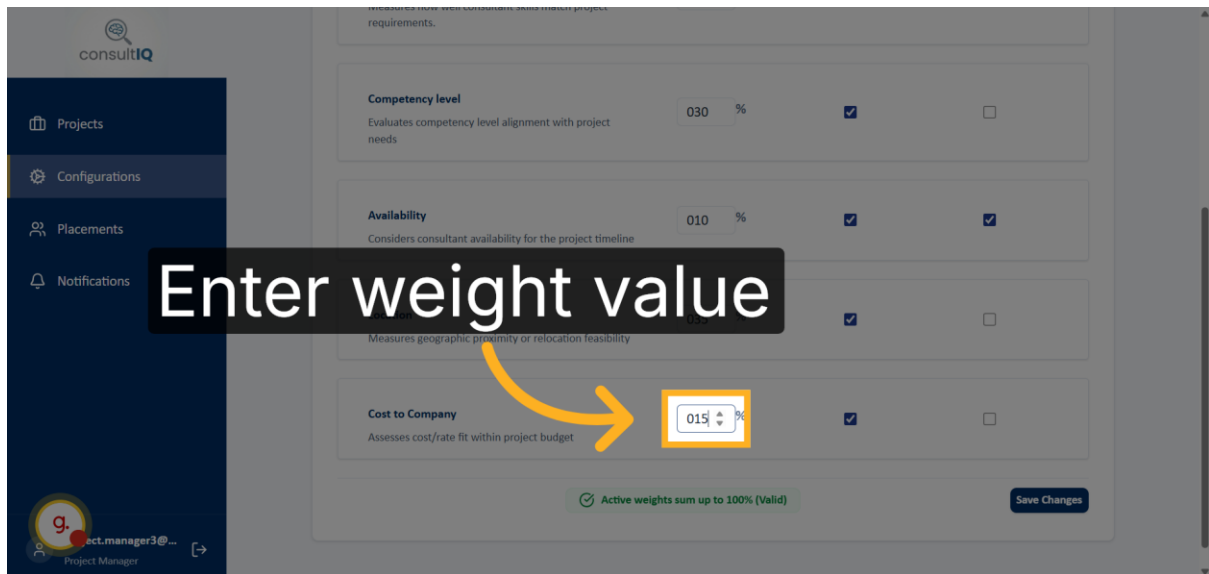

8. Modify location weight

10. Set cost to company weight

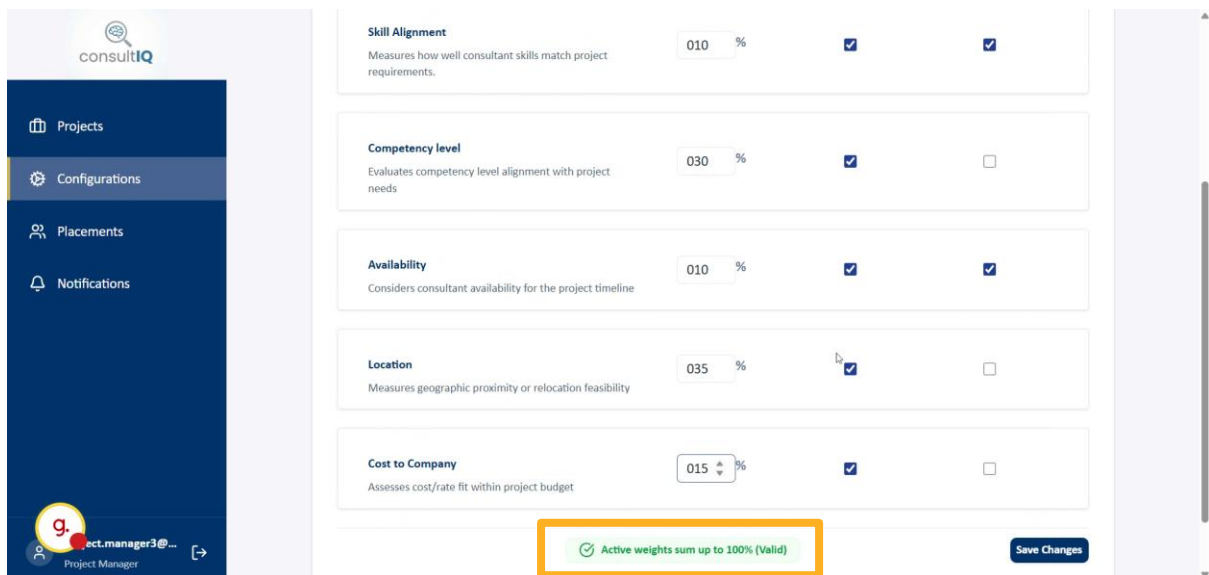

11. Fill Weight Value

12. Confirm Weight Sum

Oil. Weights need to add up to 100%.

13. Exclude Specific Factors

You can include and exclude factors as you desire.

The screenshot shows the 'Configurations' page in the consultIQ application. The left sidebar contains navigation links: Projects, Configurations (selected), Placements, and Notifications. The main content area displays a list of factors with their respective weights and checkboxes for activation and hard exclusion. The 'Availability' factor's activation checkbox is highlighted with an orange box. At the bottom, a green status bar indicates 'Active weights sum up to 100% (Valid)' and a 'Save Changes' button is present.

Factor	Weight	Active	Hard Exclusion
Skill Alignment Measures how well consultant skills match project requirements.	010 %	☒	☒
Competency level Evaluates competency level alignment with project needs	030 %	☒	☐
Availability Considers consultant availability for the project timeline	010 %	☒	☒
Location Measures geographic proximity or relocation feasibility	035 %	☒	☐
Cost to Company Assesses cost/rate fit within project budget	015 %	☒	☐

Active weights sum up to 100% (Valid)

Save Changes

14. Activate or Deactivate Factors

You can also deactivate or activate factors. Once you're done, save changes.

This screenshot is identical to the one above, showing the 'Configurations' page. The 'Availability' factor's activation checkbox is highlighted with an orange box. The interface includes a sidebar with navigation options, a main table of factors with weights and checkboxes, a status bar indicating valid weights, and a 'Save Changes' button.

Configure Consultancy-Wide Settings In ConsultIQ

This tutorial explains how to configure consultancy wide settings in the scoring engine using ConsultIQ. It covers the process of adjusting factors and managing their status to optimize the scoring engine.

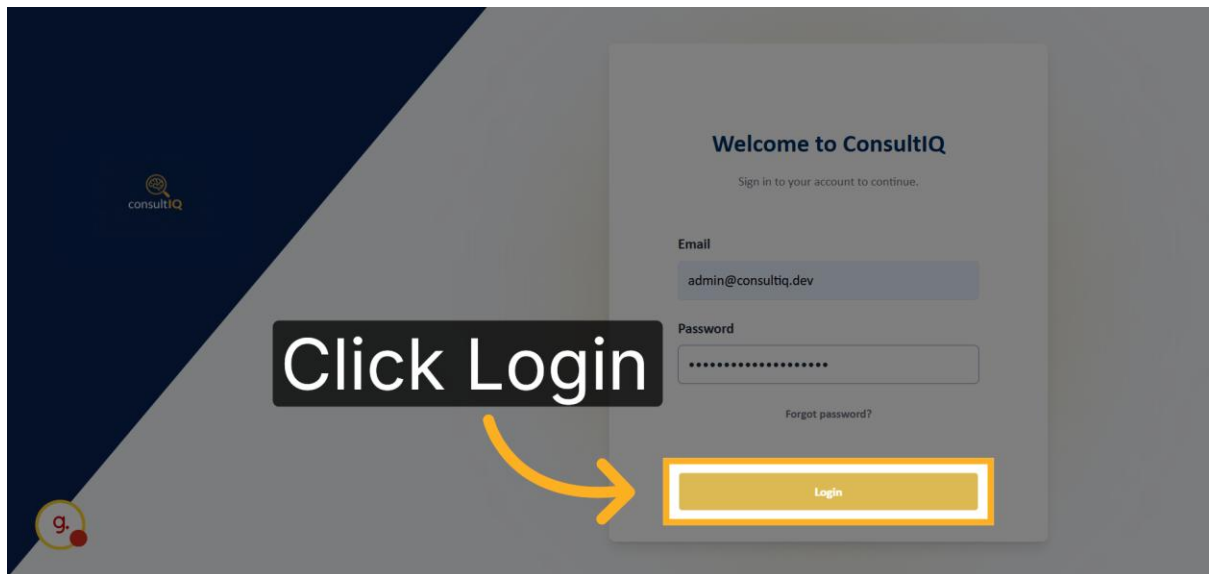

1. Admin Login To ConsultIQ

Only an admin is allowed to set the consultancy wide configurations. So as an admin, I will login by entering my email and my password.

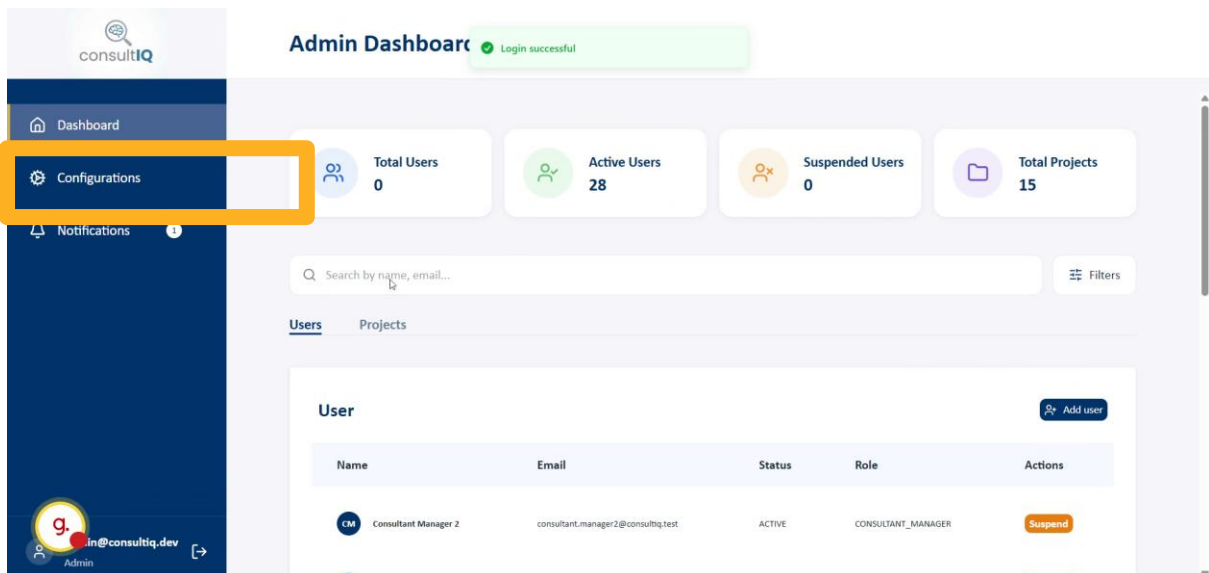

2. Click Login Button

Click the login button to access the consult IQ platform, after entering your credentials, the step initiates, the admin session for configuration management.

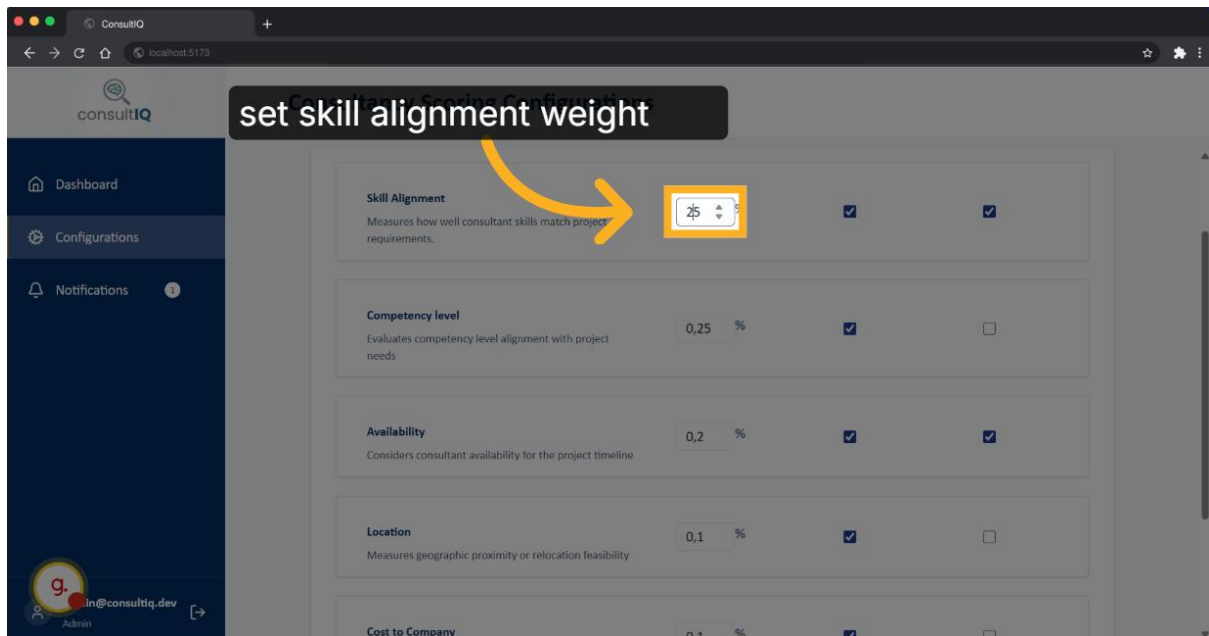

3. Navigate To Configurations Tab

After logging in, Navigate to the configurations tab.

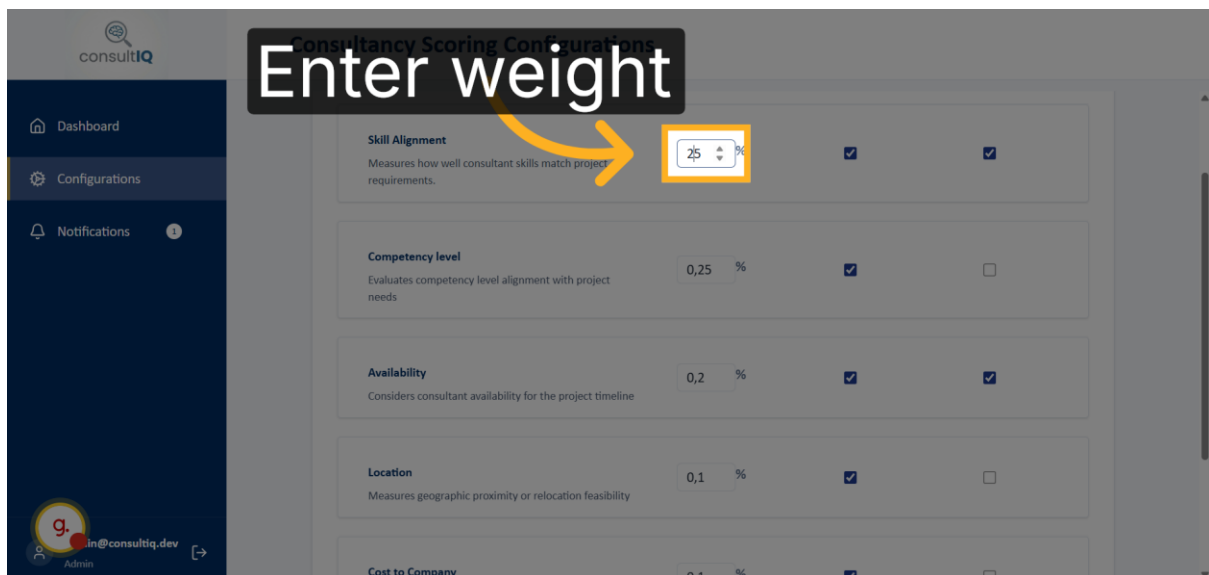

4. Select First Weight Field

You can change the weightings of each factor in the weight column. Click the skill alignment weight input box to begin. This allows you to modify the assigned percentage.

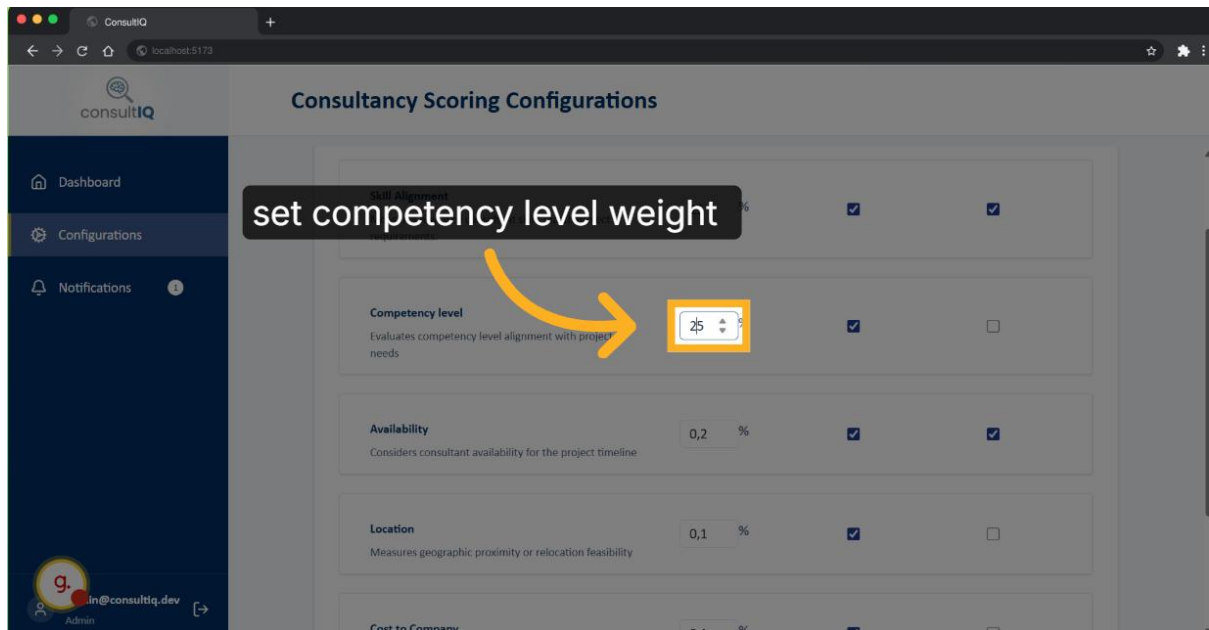

5. Enter skill alignment weight value

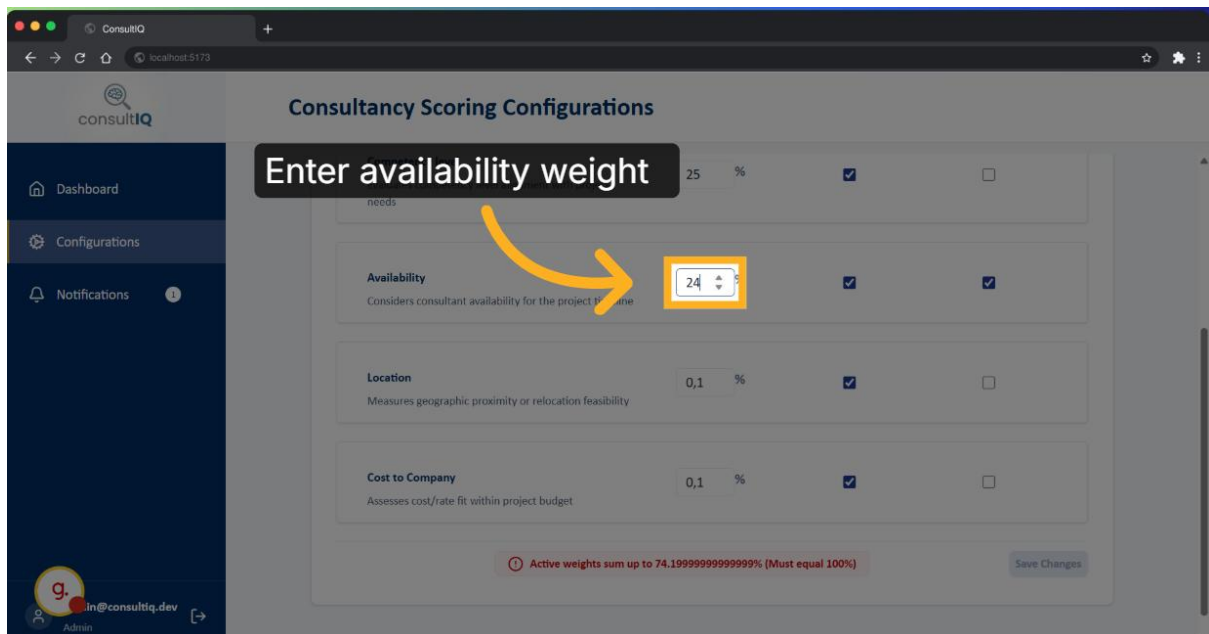

We can do this same for the rest of the weights ensure that all the weights added together, reach a total of 100%.

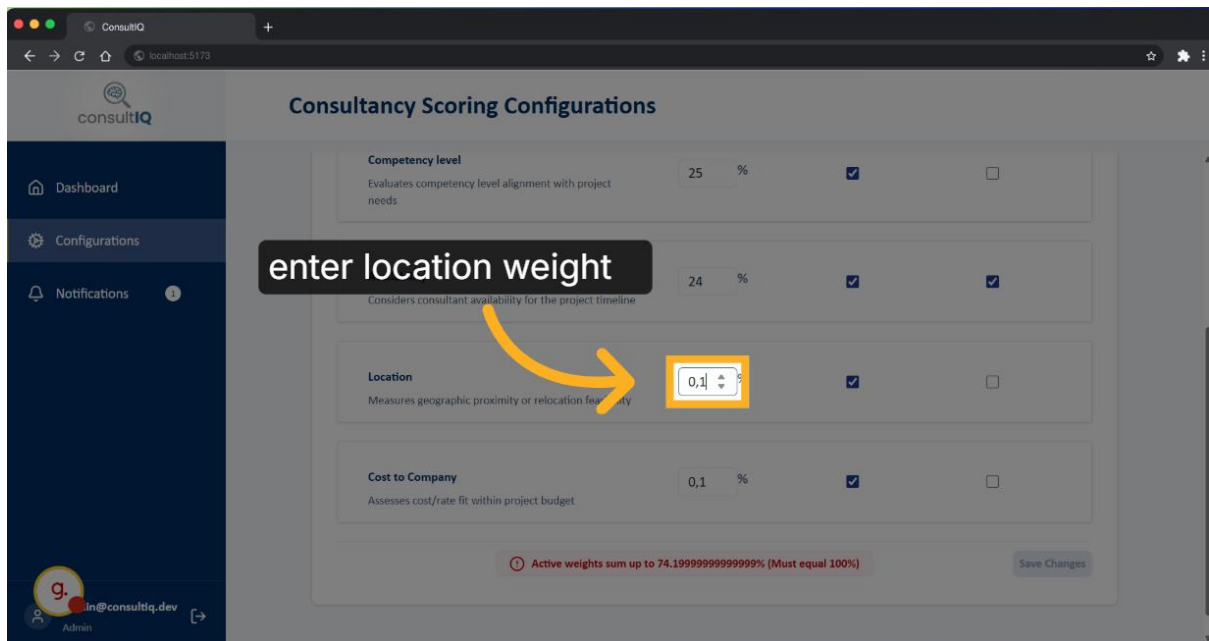

6. Enter Second Weight Value

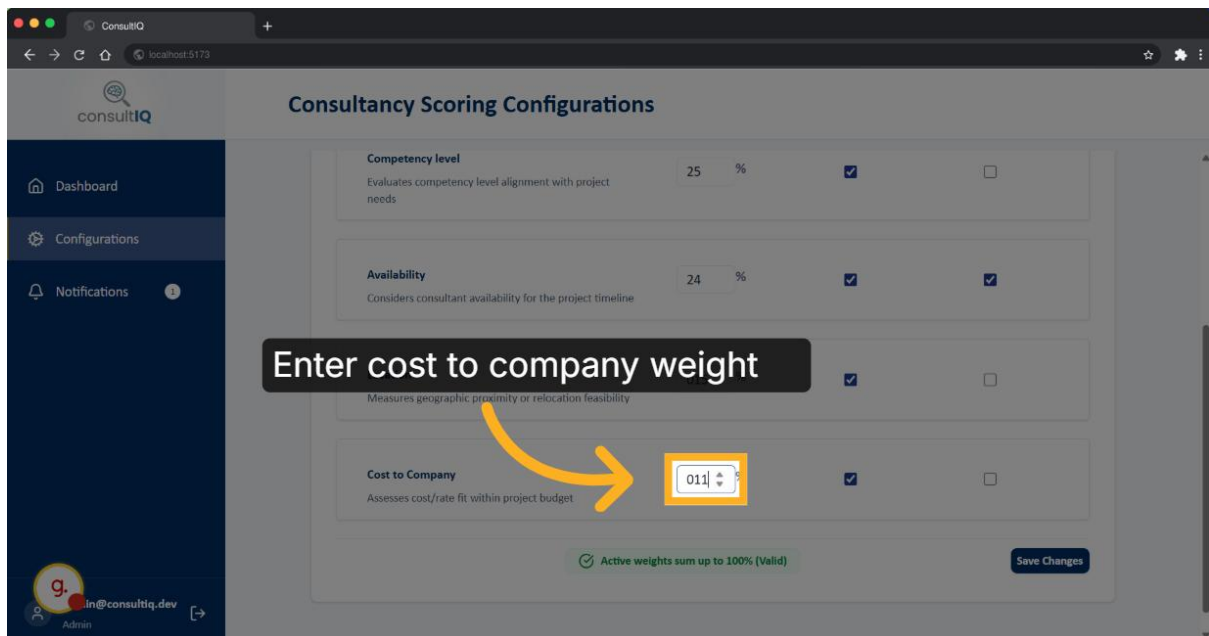

7. Enter Third Weight Value

8. Select Fourth Weight Field

9. Enter Fifth Weight Value

10. Adjust Factor Inclusion And Status

You can also include or hard exclude each factor or even deactivate them as a whole.
